MUTUALLY EXCLUSIVE

EVENTS
Mutually exclusive events are things that can't happen at the same time. In logic and probability theory, two propositions (or events) are **mutually exclusive** or **disjoint** if they cannot both occur. If A and B are mutually exclusive events then the joint probability of A and B equals zero. Thus, results to a null set.

Report On Probability A:

Report on probability A Brian Wilson Aldiss,1977 *Report on Probability A* Brian W. Aldiss,2015-05-19 An unending chain of surveillance crosses countless dimensions in this brilliant disturbing and groundbreaking antinovel by one of science fiction's greatest practitioners Mr Mary and his wife are being observed from at least three vantage points as they go about their mundane home lives G the former gardener watches them from a garden shed Mr Mary's dismissed secretary S watches them from the top room of a brick outhouse in the back The chauffeur C who no longer drives watches the Marys from the garage Each observer must file a report with his superiors in another continuum pausing in his surveillance only long enough to eat identical meals alone at the deserted caf across the street But the watchers are themselves being observed by others who are in turn being watched across vast and infinite dimensional planes in an attempt to unravel the mysteries of the world known as Probability A This brilliant experimental work by Grand Master Brian W Aldiss is a perplexing and devastatingly haunting masterwork of speculative fiction considered by many to be the greatest work in the long prolific career of a true giant of the genre Thought provoking confounding and stylistically brilliant Report on Probability A will burn its way into the reader's mind and memory Corporate Tax Evasion in a Globalized Environment Alexander Teepe,2007-02-13 Inhaltsangabe Abstract There are only few results of empirical research about corporate tax evasion and avoidance in comparison to individual tax evasion One reason is a lack of exact data Moreover due to the nature of tax non compliance it is not easy to calculate its volume There is set of empirical questions on which we can make progress such as the determinants of corporate evasion for example the impact of penalties on corporate tax directors in large enterprises or the size of a company and the owner structure It is material for policymakers to know which characteristic of enterprises let us assume that a firm evades more or less and which circumstances enhance corporate tax evasion We suggest that the developments in a more globalized world may change incentives for non compliance of enterprises and change the options to evade taxes in particular for import or export firms The growing importance of transfer prices for tax directors of multinational enterprises may emphasize this assumption But not only large multinational enterprises have options to evade taxes Also smaller companies controlled by private owners can misstate import and export invoices in order to shift profits into low tax countries or tax haven countries or build up capital in the informal economy We analyze the existing basic theory and provide a critical discussion to it And we survey the existing empirical literature about corporate tax evasion Furthermore we present the results of a corporate tax survey in China and Germany By this survey related to import and export firms of all size evidence is provided that there are remarkable incentives to evade taxes by manipulation of commercial invoices We find that this type of tax evasion by importers and exporters is basically determined by the same effects as corporate tax compliance in general but there are in addition specific effects on compliance such as effects by trading countries of the firms or by the supply chain Finally this paper presents various indications which imply the need of
