Teaching and Learning about Science Derek Hodson, 2009-01-01 Findings generated by recent research in science education international debate on the guiding purposes of science education and the nature of scientific and technological literacy official and semi official reports on science education including recommendations from prestigious organizations such as AAAS and UNESCO and concerns expressed by scientists environmentalists and engineers about current science education provision and the continuing low levels of scientific attainment among the general population have led to some radical re thinking of the nature of the science curriculum There has been a marked shift of rhetorical emphasis in the direction of considerations of the nature of science model based reasoning inquiry based learning scientific argumentation and the use of language rich learning experiences reading writing talking to enhance concept acquisition and development These findings arguments and pronouncements seem to point very clearly in the direction of regarding science education as a study of scientific practice This book presents a comprehensive research based account of how such a vision could be assembled into a coherent curriculum and presented to students in ways that are meaningful motivating and successful The author takes what might be described as an anthropological approach in which scientists are studied as a socially economically and politically important community of people This group has its own distinctive language body of knowledge investigative methods history traditions norms and values each of which can be studied explicitly systematically and reflectively This particular approach was chosen for the powerful theoretical overview it provides and for its motivational value especially for students from sociocultural groups currently under served by science education and under represented in science The book which is both timely and important is written for teachers student teachers graduate students in education teacher educators curriculum developers and those responsible for educational policy It has the potential to impact very substantially on both pre service and inservice science teacher education programmes and to shift school science education practice strongly in the direction currently being advocated by prominent science educators

Resources in Education, 2000-10 **Inquiry into the Singapore Science Classroom** Aik-Ling Tan, Chew-Leng Poon, Shirley S.L. Lim, 2014-05-19 This book offers an insight into the research and practices of science teaching and learning in the Singapore classroom with particular attention paid to how they map on to science as inquiry It provides a spectrum of Singapore s science educational practices through all levels of its education system detailing both successes and shortcomings The book features a collection of research and discourse by science educators in Singapore organized around four themes that are essential components of approaching science as inquiry

teachers ideas and their practices opportunities and constraints from a systemic level students competencies and readiness to learn through inquiry and the need for greater awareness of the role of informal learning avenues in science education In addition the discourse within each theme is enriched by commentary from a leading international academic which helps to consolidate ideas as well as position the issues within a wider theoretical and international context Overall the papers set out important contexts for readers to understand the current state of science education in Singapore They also highlight strengths and gaps in practices of science as inquiry as well as provide suggestions about how the system can be improved These research findings are therefore helpful as they provide honest and evidence based feedback as well as tangible and doable ideas that policy makers teachers students and school administrators can adopt adapt and enhance
