Political Corruption: Least and Most Corrupt Countries

Introduction

Corruption does not fit in the singular type of behavior nor does it fit in the common kind of behaviors. According to Jacobs and Anechiarico, the term corruption does not mean that the conduct in question is illegal but it serves the purpose of indicating to the laborer that the act committed is either unethical or immoral (Jacobs and Anechiarico, 1996, p. 3). Different people have different views on ethical and moral behavior hence creating room for argument on the labeling of corruption.

In modern times, public servants have been under scrutiny by the public on matters pertaining to service delivery. This has led to not only following of the laws to the latter but also avoiding the labeling of corruption in their work place. By limiting corruption to a term that is associated with conduct prohibited by law, the question of ambiguity and doubt pertaining to corruption will remain as an issue to tackle.

Corruption can take different forms of acts. Bribery for instance is considered as an official form of corruption. Officials in public offices are more prone to this kind of vice as some of them use their status in the public office for personal and private gains. In addition to this thievery is also described as one of the other form of corruption.

In thievery, the officials tend to misuse or steal government properties for personal gains. These officials go to the extent of committing fraud, undertaking personal work on the job and late arrivals at work while at the same time leaving early (Jacobs and Anechiarico, 1996, p. 3 & 4).

Integrity on the other hand indicates the quality of conducting one's self by upholding the values, rules, and norms acceptable both politically and in the public domain. Integrity violation has resulted to a number of public misconducts, which include corruption, nepotism, sexual harassment, and bribery. Corruption has recently been described as an umbrella concept. This umbrella covers majority of integrity violation (Fijnaut and Huberts, 2002, p 2).
