the conceptual design stage of effective and resource-efficient offerings Sergio Brambila, 2020-10-20 Human activities in the form of production and consumption have increased to an all time high In many cases this increase has resulted in environmental problems such as waste and pollution that in turn affect our health and way of living Societies have proposed different measures to address such environmental problems These range from different waste treatment technologies to alternative business models policy measures and lifecycle thinking in the design of products to mention but a few In this research the focus is on supporting early design activities of what is often called the conceptual design stage with the objective to provide effective and resource efficient offerings The early design activities considered here are planning analysis and evaluation Design researchers have largely supported these three activities with a variety of methods and tools However previous research has shown that design support coming from academia has had a low uptake in industry In this regard the aim of this research is to propose not only useful but also usable support for design practitioners during the conceptual design stage This research is carried out in the manufacturing sector in Sweden where selected companies expressed an interest in collaborating with academia to address more thoroughly effective and resource efficient offerings To better match company needs and research from academia this research took a pragmatic and cross disciplinary approach This research approach along with literature reviews semi structured interviews workshops and questionnaires shows different ways in which support can be made more useful and usable The main gap addressed here is that the knowledge and the related skills of the user of the support have not been sufficiently explored The results include requirements of the user of the support proposed methods and tools derived from the requirements identified and most importantly the knowledge and skills needed by the user of the support The main message of this research is that support could be expanded from methods and tools to include knowledge and skills needed by design practitioners the users of support The flow of support from academia to industry could also be reinforced in a two way flow through a pragmatic and cross disciplinary approach to first and foremost address design practitioners needs

Månskliga aktiviteter i form av produktion och konsumtion har aldrig varit högre Denna kning ver tid har i många fall lett till miljöproblem som avfall och föroreningar vilka i sin tur påverkar vår hälsa och levnadssätt För att mota dessa miljöproblem har olika tekniker utvecklats som tekniker för avfallshantering alternativa affärsmodeller policy och livscykeldesign för att minska negativa effekter Fokus i forskningen som presenteras i denna avhandling är på tidiga designaktiviteter vilka ofta kallas det konceptuella designstadiet och som syftar till att ta fram resurseffektiva erbjudanden Detta steg behandlas här genom att undersöka designaktiviteterna planering analys och utvärdering Designforskare har till stor del stöttat dessa tre aktiviteter med en mängd olika metoder och verktyg Emellertid visar tidigare forskning att designstadiet från akademien har ett lågt upptag i industrin Syftet med denna forskning är därför att förstå ett användbart stöd som också användarvänligt för utövare under det konceptuella designstadiet För att uppnå detta genomförs forskningen inom tillverkningssektorn i Sverige där deltagande företag uttryckt ett intresse av att samarbeta med akademien avseende

resurseffektiva erbjudanden. För att bättre matcha företagets behov med forskning från akademien antas en pragmatisk och tvärvetenskaplig strategi. Denna strategi tillsammans med litteratur, semistrukturerade intervjuer, workshops och enkäter visar hur såväl det i det konceptuella designstadiet kan bli mer användbart och användarvänligt. Den huvudsakliga forskningsluckan som tas upp här är att kunskap och relaterade färdigheter hos användaren av såväl det inte har undersökts tillräckligt. Resultatet ger en beskrivning av kraven på de såväl som användaren behöver förslag på metoder och verktyg som baseras på de identifierade kraven och viktigast av allt den kunskap och de färdigheter som användaren av såväl det behöver ha. Huvudbudskapet är att såväl som kan utvidgas från att omfatta metoder och verktyg till att även inkludera behovet av kunskap och färdigheter hos designutvare, det vill säga användarna av supporten. Såväl som från den akademiska världen till industrin kan också förstärkas genom att bli ett tvärvetenskapligt som med en pragmatisk och tvärvetenskaplig strategi först och främst adresserar användarens behov.

Homework Helpers: Essays & Term Papers Michelle McLean, 2011-01-20. A fun user friendly guide that takes the confusion out of writing essays and papers for students of all ages. Unlike other books that are so full of technical jargon that they confuse more than help, Homework Helpers: Essays and Term Papers uses straightforward language and simple steps to guide students through the essay writing process. Homework Helpers: Essays and Term Papers describes in detailed plain English each element and step involved in writing a dozen different types of essays. Includes a rough edited and final draft sample of each type of essay discussed. Explains the necessity of proofreading and citing sources, providing tips and instruction on how to accomplish these tasks. Presents step by step instructions on how to write a great SAT essay. Discusses what students can expect when they reach college level courses. Students of all ages can find help in writing essays for every major subject in high school or college. Neophytes will find guidance on the basics while those further along in their educational career can adapt the detailed instructions for more in-depth assignments.

The Well-Trained Mind Susan Wise Bauer, Jessie Wise, 2016-08-09. Is your child getting lost in the system, becoming bored, losing his or her natural eagerness to learn? If so, it may be time to take charge of your child's education by doing it yourself. The Well-Trained Mind will instruct you step by step on how to give your child an academically rigorous, comprehensive education from preschool through high school, one that will train him or her to read to

think to understand to be well rounded and curious about learning Veteran home educators Susan Wise Bauer and Jessie Wise outline the classical pattern of education called the trivium which organizes learning around the maturing capacity of the child's mind and comprises three stages the elementary school grammar stage when the building blocks of information are absorbed through memorization and rules the middle school logic stage in which the student begins to think more analytically and the high school rhetoric stage where the student learns to write and speak with force and originality Using this theory as your model you'll be able to instruct your child whether full time or as a supplement to classroom education in all levels of reading writing history geography mathematics science foreign languages rhetoric logic art and music regardless of your own aptitude in those subjects Thousands of parents and teachers have already used the detailed book lists and methods described in *The Well Trained Mind* to create a truly superior education for the children in their care This extensively revised fourth edition contains completely updated curricula and book lists links to an entirely new set of online resources new material on teaching children with learning challenges cutting edge math and sciences recommendations answers to common questions about home education and advice on practical matters such as standardized testing working with your local school board designing a high school program preparing transcripts and applying to colleges You do have control over what and how your child learns *The Well Trained Mind* will give you the tools you'll need to teach your child with confidence and success
