

Fourth Grade Life Science

lesson plans with activities

What is an organism?

Cells can't be seen without a microscope.

An organism is any living thing made of cells. An organism carries on life as using energy and reproducing.

Lesson 2: Internal Structures (one or two days)

4-LS2-1. Construct an argument that plants and animals have internal structures that function to support their reproduction.

1. Tell students that they will be learning about internal structures today.
2. Ask them to brainstorm for as many internal structures as they can think of. List.
3. Show the class the YouTube video: [Hi, I'm for Kids/Learn about the Human Body](#).
4. Copy off enough organ picture cards, every three or four students in your class, so you can use them in the activity. Pass one envelope out to each student. Ask them to put the picture of the organ they think is the most important in their envelope. Have them put the envelopes in a pile. Students take turns picking a card to read aloud. They say the card number and then begin reading. Others listen and write the name of the system/organ they think it is on the correct line of the recording sheet. When all cards have been read, students should see if they all agree on the answers. If not, reread the card and discuss until they come to consensus.
5. Give students the Internal Organs of the Body worksheet. After they have completed it, have each student tell what they believe is the most important system. They will most likely have different opinions, thus leading to the discussion that all systems are important and they work together.
