Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office,1957 Includes Part 1 Number 1 2 Books and Pamphlets Including Serials and Contributions to Periodicals January December **Development of control concepts for improved driving dynamics of harvesting machines with large headers** Benedikt Jung,2018-06-27 This book examines the driving dynamics of harvesting machines with large harvesting heads It looks at how to efficiently use these machines The author explores a common problem that hinders machine performance when harvesting with very large headers He deals with concepts for reducing the undesired effects of vehicle dynamics when using these machines With the steadily increasing capacity of harvesting machines the working widths of the harvesting heads get wider and the headers get heavier It has become essential with these giant headers to use header height sensors and header control systems to avoid the headers from being run into the ground when encountering elevation changes in the terrain A fundamental limitation of the viable speed of header height adjustments arises from the combination of the wider and heavier headers with soft agricultural tires The current solution to find an appropriate speed of header height adjustments is to perform a header calibration whenever a new header is attached to the machine and to endow the machine operator with the capability to tweak the speed of adjustments manually The result of an inappropriate speed of height adjustments is a reduction in overall productivity and an under utilization of the harvesting machine The author looks at ways to prevent this He offers detailed modeling of the vertical dynamics including dynamic wheel loads In addition the book contains results from simulations and machine tests **The Ship-master's Assistant and Owner's Manual** ,1796 **Teacher Education Series** Pennsylvania State University. Department of Agricultural Education,1962 *Discrete Optimization I* ,2000-04-01 *Discrete Optimization I* *Operating Systems Engineering* M. Maekawa,L.A. Copyright Office,1968 Generative Emergence Benyamin Lichtenstein,2014-06-20 How do organizations become created Entrepreneurship scholars have debated this question for decades but only recently have they been able to gain insights into the non linear dynamics that lead to organizational emergence through the use of the complexity sciences Written for social science researchers *Generative Emergence* summarizes these literatures including the first comprehensive review of each of the 15 complexity science disciplines In doing so the book makes a bold proposal for a discipline of Emergence and explores one of its proposed fields namely Generative Emergence The book begins with a detailed summary of its underlying science dissipative structures theory and rigorously maps the processes of order creation discovered by that science to identify a 5 phase model of order creation in entrepreneurial ventures The second half of the book presents the findings from an experimental study that tested the model in four fast growth ventures through a year long week by week longitudinal analysis of their processes based on over 750 interviews and 1000 hours of on site observation These data combined with reports from over a dozen other studies

confirm the dynamics of the 5 phase model in multiple contexts By way of conclusion the book explores how the model of Generative Emergence could be applied to enact emergence within and across organizations
