Cohen,2025 Entomophagy the eating of insects is an ancient practice that is still common in many parts of the world One of the best known examples is in Oaxaca where grasshoppers known as

chapulines are harvested in summer and fall toasted and enjoyed year round As Oaxaca has become a popular destination for tourists especially food tourists the consumption and market for chapulines has evolved Jeff Cohen s manuscript argues that understanding chapulines requires seeing them as a food source a cultural symbol and an economic engine Part I Approaching Chapulines introduces the women at the heart of this study and documents how they harvest prepare and consume grasshoppers Part II Eating and Thinking Chapulines moves to how other people consume chapulines For many Oaxacans especially those in the Central Valleys chapulines are a regular part of the diet a food that is highly anticipated every year as discussed in chapter three Chapter four documents how tourists approach chapulines Those who try chapulines are usually looking for an experience something to connect them with the real Oaxaca rather than a meal Part III Marketing Chapulines follows the women whom Cohen calls chapulineras as they carry chapulines to the marketplace As with markets everywhere COVID 19 was a massive disruption but the chapulineras created a touchless economy that allowed for continued production even as markets closed and most communities isolated in place If tourists see chapulineras as poor rural Indigenous women who are struggling to make ends meet these chapters contradict that assumption and reveal the entrepreneurial energy that they bring to the marketplace A conclusion expands on the text to consider the broader world of food studies and asks why anyone would eat a bug **The Oxford Handbook of the Olmecs** Christopher A.

Bell,Marcello A. Canuto,Robert J. Robson,Dan Klooster,Jorge Hernández-Díaz,2018-10-26 Out migration might decrease the pressure of population on the environment but what happens to the communities that manage the local environment when they are weakened by the absence of their members In an era where community based natural resource management has emerged as a key hope for sustainable development this is a crucial question Building on
