

Population Distributions

How does population distribution affect the outcome?

Why?

Alaska voters were 100% white and 100% female. In the largest case in the District Court, one white + 99% females of nearly 100,000 people voted for some anti-gay candidate in Alaska. Later, when 50% of the median white and female in a population of nearly 2 million for voters 1 (President of the US) and 99% of the total were not represented, anti-gay candidate. What are the reasons for this high population white negative distribution and what effect does this representation have on the outcome?
