

Research Paper in APA format:

- A research paper (especially one that requires APA style) is different than a term paper, a creative writing paper, a composition-style paper, or a thought paper.
- A research paper requires you to leave out any personal information (both as content or in your writing style – see below) and to focus on research findings that have been put forth previously (the Intro section), that you have looked at and how (the Purpose (hypothesis), and Method section), and what your findings were (the Results and Discussion section).
- Research papers although generally similar may have different requirements depending on the course (and more specifically the instructor). This is not meant to confuse or frustrate students, rather it comes out of the requirements for publication that vary among fields (e.g., the type of information and the way it is presented has different requirements for behavioral journals than for social psychology journals). Best advice is to follow your instructor's guidelines!
- APA style, although similar, may change over the course of time – information such as how to write the reference section has been changed from edition to edition in the APA Publication Manual

General Tips on Writing Style:

- Impersonal style – as a guideline minimize using first person (e.g., “this study was conducted...” rather than “we conducted this study...”) although there are exceptions; see the APA Publication Manual for any questions about this
- Do not include any personal statements or anecdotes (e.g., “I was interested in studying eating disorders because my sister was diagnosed with...” does not belong in a research paper!)
- Verb tense – as a guideline use past tense (e.g., “the results indicated” rather than “the results indicate”) although there are exceptions; see the APA Publication Manual for any questions about this
- Contractions – do not use contractions! (e.g., “it does not follow” rather than “it doesn't follow”)
- Biased language– keep up to date with appropriate terms, especially if you are writing a paper that involves gender, race, ethnicity, sexual orientation, etc. The APA Manual includes information about terms that are deemed appropriate for use in research papers
- Citations – be sure to cite your sources. Try to paraphrase as much as possible (as opposed to quoting)...a couple of ways to do this:
