Elgot,2012-12-06 Cal Elgot was a very serious and thoughtful researcher who with great determination attempted to find basic explanations for certain mathematical phenomena as the selection of papers in this volume well illustrate His approach was for the most part rather finitist and constructivist and he was inevitably drawn to studies of the process of computation It seems to me that his early work on decision problems relating automata and logic starting with his thesis under Roger Lyndon and continuing with joint work with Hiichi Wright Copi Rutledge Mezei and then later with Rabin set the stage for his attack on the theory of computation through the abstract treatment of the notion of a machine This is also apparent in his joint work with A Robinson reproduced here and in his joint papers with John Shepherdson Of course in the light of subsequent work on decision problems by Hiichi Rabin Shelah and many many others the subject has been placed on a completely different plane from what it was when Elgot left the area But I feel that his papers results and style were very definitely influential at the time and may well have altered the course of the investigation of these problems As Sammy Eilenberg explains the next big influence on Elgot s thinking was category theory which gave him a way of expressing his ideas in a sharply algebraic manner The joint book with Eilenberg is one illustration of this influence *Oswaal CBSE Class 10th 20 Combined Sample Question Papers ( Science, Mathematics Standard, Social Science, English Language And Literature) & 10 Previous Years' Solved Papers (Set of 2 Books) For 2024 Board Exams* Oswaal Editorial Board,2023-10-28 Description of the Product Comprehensive Coverage Covers all Major subjects Concise Crisp with Mind Maps Revision Notes
