

U1 - WS 1 - Interpreting Graphs

- Consider the position vs. time graph on the right for cyclists A and B. Write down everything you can about what these graphs tell you about the two cyclists. Provide as many details as possible. *Be as specific as you can while providing a justification for what you know.*
- Consider the position vs. time graph on the right for cyclists C and D. Write down everything you can about what these graphs tell you about the two cyclists. Compare the motions of the 4 cyclists (A, B, C & D) in both graphs. Provide as many details as possible. *Be as specific as you can while providing a justification for what you know.*
- Sketch a "stack" of both position vs. time and velocity vs. time graphs corresponding to the following descriptions of the motion of an object. Remember to keep the scale on your time axes the same.
 - The object is moving away from position 0m at a constant (steady) speed.
 - The object is standing still.
 - The object moves toward position 0m at a steady speed for 10s, then stands still for 10s.
 - The object moves away from position 0m at a steady speed for 10s, reverses direction and moves back toward the origin at the same speed.
- Copy the given position vs. time graphs. Complete the stack of graphs by adding the velocity vs. time graphs for an object whose motion produced the four position vs. time graphs shown.
