Concrete Solutions 2014 Michael Grantham, P A Muhammed Basheer, Bryan Magee, Marios Soutsos, 2014-08-18 The Concrete Solutions series of International Conferences on Concrete Repair began in 2003 with a conference held in St Malo France in association with INSA Rennes Subsequent conferences have seen us partnering with the University of Padua in 2009 and with TU Dresden in 2011 This conference is being held for the first time in the UK in association with the University of Padua

In Defence of Cosmopsychism Khai Wager, 2025-10-16 Is the cosmos itself conscious and could our minds be aspects of its vast overarching consciousness In this ambitious and original study Khai Wager defends cosmopsychism the view that the universe as a whole is conscious and that individual minds like ours derive from this cosmic consciousness Wager situates cosmopsychism within what he calls the landscape of fundamental consciousness bringing it into productive dialogue with closely related views such as panpsychism panqualityism and perennialism The result is a fresh perspective on one of philosophy's deepest puzzles the nature and origin of consciousness The problem of phenomenal consciousness asks how subjective experience can emerge from non-conscious matter Fundamental approaches reject the idea that consciousness arises from non-conscious matter instead proposing that it is present at the most basic level of reality Panpsychism the most prominent such view holds that all fundamental microphysical entities are conscious This however leads to the combination problem how do billions of micro-level minds combine to form distinct macro-level minds like ours Cosmopsychism offers a radical alternative rather than being formed from a combination of micro-level instances of consciousness individual minds derive from a larger cosmic-level consciousness As a result cosmopsychism sidesteps the combination problem entirely However a new and equally pressing challenge arises the derivation problem how do individual minds derive from the cosmic consciousness Through rigorous and insightful analysis Wager argues that cosmopsychism can navigate these problems and offers a compelling alternative to both physicalism and panpsychism As such this first book-length treatment of cosmopsychism makes an illuminating contribution to debates about the nature of reality and our place within it

Coherence and Divergence in Services Trade Law Rhea Tamara Hoffmann,Markus Krajewski,2020-07-23 This book addresses topical questions concerning the legal framework of trade in services and assesses how these issues are dealt with in GATS and in selected preferential trade agreements In addition the chapters discuss whether the differences and similarities if any are evidence of greater coherence or greater divergence The book combines the individual analyses to provide a more comprehensive picture of the current law on services trade liberalisation A quarter of a century after the conclusion of the General Agreement on Trade and Services GATS international law on trade in services is still in a state of flux on the one hand countries increasingly conclude bilateral and regional trade agreements with sections on trade in services that aim at a further liberalisation of services trade On the other the GATS structure remains the dominant model and serves as the basis for many preferential trade agreements In addition new aspects such as electronic commerce data protection and taxation are now emerging while issues that had already manifested in the mid 1990s such as financial services regulation labour mobility and telecommunications continue to be problematic Usually the debates focus on the question of whether preferential trade agreements serve as a stepping stone or stumbling block for trade liberalisation at the multilateral level However it can be assumed that rules on trade in services in preferential trade agreements will coexist with the global GATS regime for the foreseeable future This raises the question of whether we re currently witnessing a drive towards greater coherence or more divergence in agreements on trade in services
