Baker,1897      *Urban Hydroinformatics* Roland K. Price,Zoran Vojinovi?,2011 This book is an introduction to  
hydroinformatics applied to urban water management It shows how to make the best use of information and communication  
technologies for manipulating information to manage water in the urban environment The book covers the acquisition and  
analysis of data from urban water systems to instantiate mathematical models or calculations which describe identified  
physical processes The models are operated within prescribed management procedures to inform decision makers who are  
responsible to recognized stakeholders The application is to the major components of the urban water environment namely  
water supply treatment and distribution wastewater and stormwater collection treatment and impact on receiving waters and  
groundwater and urban flooding Urban Hydroinformatics pays particular attention to modeling decision support through  
procedures economics and management and implementation in both developed and developing countries The book is written  
with post graduates researchers and practicing engineers who are involved in urban water management and want to improve  
the scope and reliability of their systems      **U.S.D.A. Forest Service Research Note RM.** Rocky Mountain Forest and
