

RollEase Roller Roman Shade - Fabrication Instructions

Roller Roman Shade Clips work with manual or motorized systems. These instructions are for use with manual clutch systems.

1.) CUT MOUNTING BOARD

Cut your wood mounting board to the width of your finished shade. Wrap the board in fabric or paint it if desired.

2.) CUT TUBE

Select the tube size and corresponding clutch and bracket set. Cut your tube a few inches shorter than your wood board.

The Roller Roman SpoolClip is available in 3 sizes:

TUBE	RR-SPOOL	RR-CLIP
1 1/4	CS3US	RRTC125
1 1/2	CS4US	RRTC15
2	CS5US	RRTC2

CLUTCH OPTIONS

(R-Series: R3, R8) (Skyline: SL-6)
(R-Series: R8, R-16, R24) (Skyline: SL-8, SL-12 SLG-16) (Galaxy: G-100, G-200, G-400)
(R-Series: R-16, R24) (Skyline: SLG-16) (Galaxy: G-100, G-200, G-400)

3. INSTALL THE BEAD CHAIN OR CONTROL CORD INTO THE CLUTCH.

Push a loop up from behind the guard. Firmly push the cord clockwise against a tooth edge, until the pulley moves, trapping the cord in the pulley.

Use a pencil eraser to rotate the pulley clockwise, one tooth at a time, all the way around to the other side.

A loop will remain in front of the guard. Pull on the cord from behind the guard until the the entire loop falls behind the guard.

4. IF USING 2" TUBE, INSERT ADAPTERS. The adapters must be inserted into the tube before the clutch and plugs are inserted.

5. IF USING PLASTIC BEAD CHAIN, POSITION THE PLASTIC CONNECTOR AS THE UPPER SHADE STOP.

Decide which end of the tube you want to put the clutch in. Keep track of which is the "clutch end" of the tube.

Point the clutch into "its" end of the tube, and pull on the upper chain until the connector touches the clutch firmly. (Do not attach the lower plastic stop, or any stops on metal bead chain, until installing the shade.)

6. INSERT THE CLUTCH AND END PLUG INTO THE TUBE.

IMPORTANT: To remove the clutch or end plug from the tube, gently twist a screwdriver in one or more of the slots between the plastic part and the metal tube. **DO NOT PULL** the parts out; you might break them. Only pry them gently.

7. MOUNT THE BRACKETS - INSTALL TUBE. (If using Spools, Step 5-9 (sliding spools onto tube) should be completed before mounting shade.)

R-SERIES

If the clutch is on the right end of the shade, attach the brackets to the right side of wood board as shown. If the clutch is on the left end of the shade, reverse the bracket positions, left for right.

- Push the clutch straight onto the blade of its bracket. The bottom of the clutch should always point straight down towards the bottom of the shade.
- Lower the lug of the end plug onto the "V" of its bracket. The roller should fit in the brackets securely, with just a little play. Rotate the riveted retainer portion to lock the lug in position. Note: Remember you are building the shade upside down, make sure the lug is positioned so it will be on top of the "V" when the shade is hung in the window.

SKYLINE

Attach the brackets to the mounting board. Brackets are universal so clutch may be mounted on either side.

- Put the spring loaded pin into the round hole of the bracket.
- Keeping the pin end secured in it's bracket, insert the hook arms on the clutch straight into the two hook arm receiver holes of the bracket. Once the two hook arms are through the holes, gently pull down on the clutch until the two hook arms have locked securely to the bracket. The bottom of the clutch should always point straight down.
