highlights children's emotional development and the all too often neglected role of fathers. Bold attention is given to considerations of gender especially fathers as males as well as the emotions of envy greed jealousy and competitiveness as they influence development and parenting. How these apparently negative emotions may be recognized and used constructively to enhance development is discussed in detail. This new understanding and approach to child development and parenting is a welcome addition to the resources on parenting currently available.

Internationalizing the Teaching of Psychology Uwe Gielen, Grant J. Rich, Harold Takooshian, 2017-08-01. How can psychology professors in the USA and other nations make their courses more international? This question is addressed in this indispensable new sourcebook co-authored by 73 contributors and editors from 21 countries. In recent decades psychology has evolved from an American dominated discipline to a much more global discipline. Preliminary estimates by Zoma and Gielen 2015 suggest that approximately 76% 78% of the world's one million or so psychologists reside outside the U.S. However most textbooks in the field continue to rely predominantly on research conducted in North America and Europe. Our book is intended to introduce psychology instructors to a variety of broad perspectives as well as specific suggestions that can support their efforts to internationalize their course offerings at both the undergraduate and graduate levels. In this way they can prepare their students to become more culturally sensitive and function more effectively as citizens and psychologists in the evolving globalized world. To achieve these ambitious goals the editors have assembled an international group of 73 distinguished contributors who taken together have taught and conducted research in all regions of the world. The chapters in the book include both core areas of psychology and subdisciplines that represent rapidly expanding and internationally important areas such as cross cultural psychology and the psychology of gender. The chapters cover key topics and areas included in the course offerings of psychology departments both in the United States and in other countries. In addition to a discussion of international perspectives relevant to a given area all chapters include an annotated bibliography of pertinent books articles web related materials films videos and so on. Based on this information both highly experienced and less experienced psychology instructors can add globally and culturally oriented dimensions to their respective courses. This is important because universities departments and accrediting agencies increasingly put pressure on instructors to broaden and internationalize their courses. As a long time international psychologist myself I see this bold new volume as a great leap forward for international psychology. The 73 distinguished contributors and editors from 21 countries have carefully crafted a handbook that will be the go to resource on the topic for years to come. For psychology to continue to be relevant in the 21st century it must become more international. I am grateful this book will help us accomplish this challenging but rewarding goal. Philip G. Zimbardo Ph.D. Past President American

Psychological Association What could be more important than understanding human behavior and the thoughts and emotions that underlie it By teaching psychology to the world we offer the possibility of using our discipline to create a better future for all of us The chapters in this excellent book help teachers of psychology move from an ethnocentric perspective to a global way of thinking about and telling about a truly international psychology Diane F Halpern Ph D Past President of the American Psychological Association and Professor of Psychology This is a brilliant unprecedented collection of international scholarship that every psychology professor and student should read The 21st century in the teaching of psychology has truly arrived with this book creating a thoroughly needed international focus for our pedagogy Frank Farley Ph D L H Carnell Professor Temple University Former President American Psychological Association APA International Council of Psychologists American Educational Research Association AERA and the Society for International Psychology Division 52 of APA Internationalizing Teaching of Psychology contains chapters authored by eminent psychologists of diverse cultural background inclusive of different cultural perspectives on range of topics of contemporary importance Thus the volume integrates research emanating from varied cultural contexts facilitating development of a truly universal psychological science The volume is a major resource for teaching courses on Cultural Cross cultural Global psychology and in enhancing internationalization of psychology Prof Janak Pandey University of Allahabad India Editor Psychology in India The State of the Art All involved in the training of psychologists will want to recommend this book which thoroughly presents an international perspective on the teaching of psychology Rich Gielen and Takooshian consider the basic nature of psychology at the same time emphasizing cultural differences and relating it all to real life As expert cross cultural researchers the contributors provide a much needed resource and up to date reference for psychologists and students as well as for any scholar interested in our discipline around the globe Laura Hernandez Guzman Ph D Professor of Psychology Universidad Nacional Autonoma de Mexico Past President of the Mexican Psychological Society Since the mid twentieth century the world has become an increasingly smaller place at least in the figurative sense And yet Western psychology has been slow to grasp the culturally limited scope of much of our science Although the movement toward a more culturally inclusive psychology had its roots at least as early as the 1960s more recent meta analyses have shown that a large percentage of the psychological literature has represented a small percentage of the world s population In Internationalizing the Teaching of Psychology Grant Rich Uwe Gielen and Harold Takooshian are making a noteworthy effort to inform and support teachers who would move the field toward a psychology of all people From advice about getting involved in international psychology to stand alone international psychology courses to the problems of culture bound specialized courses these well traveled and experienced editors have assembled a resource that psychology teachers will find both interesting and valuable Kenneth D Keith President Society for the Teaching of Psychology University of San Diego This volume is a positive contribution to the internationalization of the psychology curriculum Given the very large numbers of psychology undergraduate and graduate

students across the world such internationalization has significant potential to provide learners with opportunities to better understand the similarities and differences in the behavior of humans in different local national and international contexts Such understanding can lead to a greater appreciation of and perhaps respect for and celebration of these similarities and differences thus potentially leading to actions that reduce global human suffering This volume should become an indispensable tool for psychology educators interested in such outcomes Jacquelyn Cranney Psychology UNSW Sydney Australia This book is a necessity given the increasing mobility of psychologists use of technology in psychology practice and need to regulate the psychology profession globally The content in this book will go a long way to improve psychological literacy in our East and Central Africa region I chaired the first ever East and Central African Regional Psychology Conference in Uganda in 2013 and am on the Board of Directors of the International Association of Applied Psychologists IAAP so am keenly aware that the internationalization of scientific psychology knowledge and skills is an imperative James Kagaari Ph D President Uganda Council of Psychologists Teaching psychology in your own country especially when it is a country as vast and diverse as the United States where fewer than half its citizens hold a passport makes it all too easy to give courses in which students come away with the impression that what psychological scientists have learned about behavior and mental processes at home applies equally in the rest of the world That is not always the case of course and the chapters in this valuable volume serve not only to remind us of that fact but to stimulate us to consider adjusting the content of our courses to make them as they should be more international in scope Douglas Bernstein Courtesy Professor of Psychology University of South Florida USA Bravo to this all star cast of international contributors for showing us how to help students appreciate both our cultural diversity and our human kinship and for providing us with accessible articles books media and online materials for teaching every area of psychology from a more international perspective David G Myers Hope College co author Psychology 12th Edition and Social Psychology 12th Edition Imagine that you convened an invitation only panel of 73 experts from around the world and asked that they guide the profession in internationalizing the teaching of psychology This book would be the impressive result Here s the definitive how to guide on adding global and cross cultural perspectives to courses throughout the psychology curricula John C Norcross Ph D ABPP Distinguished Professor of Psychology at University of Scranton Adjunct Professor of Psychiatry at SUNY Upstate Medical University In today s increasingly interconnected world the ever emerging importance and impact of integrating psychology into education is powerfully presented in this book The editors themselves outstanding experts in the field have assembled an exceptionally impressive collection of 28 chapters by 73 expert contributors covering varied aspects of teaching psychology from an international and multicultural perspective Educators students psychologists as well as stakeholders in related disciplines will find the theories and practical guides as essential and useful resources Judy Kuriansky PhD United Nations NGO representative the International Association of Applied Psychology Department of Psychology Columbia University Teachers

College *The Psychologically Literate Citizen* Dana Dunn, 2013-01-01 The concepts of psychological literacy and the psychologically literate citizen promise to invigorate a new global approach to psychology education They pose a basic question What attributes and capabilities should undergraduate psychology majors acquire Many psychological organizations have defined psychological literacy by guidelines and lists of student learning outcomes but although psychology educators across the globe have been working towards helping students to acquire these attributes over the past 50 years educators have only recently explicitly delineated attributes and learning outcomes and sought to develop appropriate learning teaching and assessment strategies including whole program approaches The contributors to this volume argue that psychological literacy is the most important outcome of an undergraduate psychology education and that psychologically literate citizens use their knowledge of psychology to problem solve in ethical and socially responsible ways that directly benefit their communities In this book a rich variety of international perspectives contribute to the development of the two key concepts of psychological literacy and the psychologically literate citizen Authors provide practical guidance for classroom psychology educators as well as curriculum developers and reviewers Ultimately they make the case for a paradigm shift in psychology education The Identities and Practices of High Achieving Pupils Becky Francis, Barbara Read, Christine Skelton, 2012-02-02 How do some students manage to excel in their studies and be popular while other high achievers are treated as social outcasts This lively and accessible text looks at the relationships between gender race and social class and attainment and popularity for high achieving pupils The internationally renowned authors present a lucid theoretical framework that reflects the complexity of these issues placing them within the broader context of the policies that cause and constrain particular behaviours among teachers and pupils The authors draw together empirical data bringing the realities of young people to life and presenting the lessons that can be learnt to enhance the educational achievement of all students It is an engaging text for advanced undergraduate and postgraduate students exploring the debates on identity and achievement Understanding the Life Course Lorraine Green, 2016-12-20 Understanding the Life Course provides a uniquely comprehensive guide to the entire life course from an interdisciplinary perspective Combining important insights from sociology and psychology the book presents the concepts theoretical underpinnings in an accessible style supported by real life examples From birth and becoming a parent to death and grieving for the loss of others Lorraine Green explores all stages of the life course through key research studies and theories in conjunction with issues of social inequality and critical examination of lay viewpoints She highlights the many ways the life course can be interpreted including themes of linearity and multidirectionality continuity and discontinuity and the interplay between nature and nurture The second edition updates key data and includes additional material on topics such as new technologies changing markers of transitions to adulthood active ageing resilience and neuropsychology This comprehensive approach will continue to be essential reading for students on vocational programmes such as social work and nursing and will provide thought provoking insight into the wider

contexts of the life course for students of psychology and sociology

Profiling and Serial Crime Wayne

Petherick, 2012-12-02 Profiling and Serial Crime examines the principles of behavioral profiling and then applies them to serial crime. This book is a completely revised and updated edition of an excellent text on behavioral profiling and serial crime. It provides a theoretical and practical foundation for understanding the motivation and dynamics in a range of serial offenses. Part I of the book deals with the history, crucial issues, methods, theory, and treatment in the mainstream media. Part II discusses serial crime in detail, including bullying, stalking, rape, murder, and arson. The title of this edition reflects the focus on profiling as well as serial crime and has been updated throughout with the latest research. New to this edition are five all-new chapters, including serial harassment and cyber bullying, and the motivations of victim and offender. Two replacement chapters on serial rape and serial arson enhance pedagogy to keep students focused on what's important and new. Ancillary materials for both instructor and student. The book consists of ancillary online materials for instructors and students, including lecture slides, test bank, and case studies. Numerous case examples are included to show the real-world uses of behavioral profiling in investigations. This book will appeal to professionals and students in criminal justice and forensic psychology programs, as well as those taking courses in criminal profiling, especially courses on serial crime. Provides a theoretical and practical foundation for understanding the motivation and dynamics in a range of serial offenses. Ancillary online materials for instructors and students, including lecture slides, test bank, and case studies. Numerous case examples show the real-world uses of behavioral profiling in investigations.

Psychology of Agile Bhuvan Unhelkar, 2024-11-29 Agile

is a mindset and a culture that has evolved beyond software development to encompass all forms of project management, business organizations, defense, and society. In today's fast-paced and ever-changing world, adopting an Agile approach is essential for organizations to thrive and maintain competitiveness. This book aims to extend the concept of Agility beyond the four declarations of the Manifesto and apply it to various projects, organizations, and even society. The book delves into the intricacies of Agile and highlights its significance in modern workplaces. It emphasizes that Agile is more than just a set of tools and techniques; it is a way of thinking and a culture that requires a deep understanding of psychology and sociology. Key topics discussed include Agility as a leadership characteristic, the meta-mind of Agile, Agile mind map beyond the manifesto, and methods. Psychological frameworks: Maslow, TA, MBTI, Left-Right, Slow-Fast, relevant to Agile work and psychosocial games at work. Psychological development and Composite Agile Method and Strategy. CAMS Agile organizational structures and behaviors. Agile Transformations in the Digital Age. This book is valuable for Agile coaches, mentors, and Scrum Masters looking for more comprehensive answers than what an Agile framework can provide. It is also helpful for business leaders, stakeholders, and product owners who need to deal with ambiguous or unclear issues, as well as project managers and team leaders who already have experience in Agile but feel like something is missing. Additionally, HR professionals and trainers involved in Agile transformation can benefit from this book.

The Otherworld in Myth, Folklore, Cinema, and Brain Science Jim Kline, 2019-04-09 This volume explores a dimension of reality usually scoffed at by rational thinking

individuals living in modern industrialized societies but still experienced by these same individuals when they are in a stage of sleep known as rapid eye movement REM sleep this is the stage in which vivid and bizarre dreams are a person's living reality While in this stage we believe what we experience is real but then deny its reality upon awakening as we go about our daily routines Yet in many cases a dream with vivid imagery and bizarre goings on is communicating with the dreamer in an archaic language directly associated with an Otherworld reality This reality exists within us and expresses concepts and ideas about our realm of existence that pertain to our waking lives as well as to an alternate archaic life with its own language and ideas transcending physical reality By studying various myths and folk tales along with cinematic portrayals of otherworldly experiences commentary from modern individuals and reports from traditional shamans who are experts at traversing the Otherworld reality this text discerns the features and characteristics of this supernatural realm Contemporary research into the Otherworld marks this realm as corresponding to the unconscious substratum of the human psyche what C G Jung referred to as the collective unconscious Certain scientists have found evidence of its connection with various aspects of brain functioning suggesting that the brain in many ways encourages a belief in the Otherworld However it would be a mistake to call the Otherworld a figment of the human imagination since this realm seems to have a type of physical existence The book considers the Otherworld to exist and provides reasons why rational thinking individuals are hesitant to accept its existence even when their brains are telling them the Otherworld is real and you have just experienced it
