The T48 Controller accepts signals from a variety of temperature sensors (thermocouple or RTD elements), precisely displays the process temperature, and provides an accurate output control signal (linear proportional or linear DAC) to maintain the process at the desired temperature. The controller's noncomplicated yet simple programming allows it to meet a wide variety of applications.

The two-channel operators in the PTD control module for both heating and cooling, with on-demand status, which will establish the heating control. The PTD heating control module is controlled by the operator in any time and then locked out from further modification. The control system is a single channel control system, which allows the operator to operate in either automatic or manual mode. The unit can be transferred to operate in the manual mode, providing the operator with direct control of the output. The controller may also be programmed to operate in the PTD/PTD control mode with automatic functions. A second operator is available on select module to allow quick selection of a different control module.
