Setswana Home Language Paper 1:

Assessment of Reading in International Studies Jenny Lenkeit, Knut Schwippert, 2020-05-21 This book brings together contributions from different scholarly contexts that address a diverse range of focused topics as well as empirical and conceptual perspectives on research with international studies Some chapters focus on technical aspects exploring opportunities for drawing causal inferences from the data and investigating biases originating in distributional scale properties Others are of a more conceptual nature addressing changes in the relevance of socio economic indicators across time and countries examining the exposure of mother tongue and English instruction on performance and investigating the effects of test construction on gender difference The discussion takes a much needed meta perspective on the usefulness of international large scale assessments for educational research and allows reflection upon possibilities and opportunities for their improvement This book was originally published as a special issue of Assessment in Education Text Variability Measures in Corpus Design for Setswana Lexicography Thapelo J. Otlogetswe, 2011-01-18 This book is about the design of a Setswana corpus for lexicography While various corpora have been compiled and a variety of corpora based research has been attempted in African languages no effort has been made towards corpus design Additionally although extensive analysis of the Setswana language has been done by missionaries grammarians and linguists since the 1800s none of this research is in corpus design Most research has been largely on the grammatical study of the language The recent corpora research in African languages in general has been on the use of corpora for the compilation of dictionaries and little of it is in corpus design Pioneers of this kind of corpora research in African languages are Prinsloo and De Schryver 1999 De Schryver and Prinsloo 2000 and 2001 and Gouws and Prinsloo 2005 Because of a lack of research in corpora design particularly in African languages this book attempts to fill that gap especially for Setswana It is hoped that the finding of this study will inspire similar designs in other languages comparable to Setswana We explore corpus design by focusing on measuring a variety of text types for lexical richness at comparable token points The study explores the question of whether a corpus compiled for lexicography must comprise a variety of texts drawn from different text types or whether the quality of retrieved information for lexicographic purposes from a corpus comprising diverse text varieties could be equally extracted from a corpus with a single text type This study therefore determines whether linguistic variability is crucial in corpus design for lexicography
