z/TPF Application Modernization using Standard and Open Middleware Lisa Dianne Banks, Mark Cooper, Chris Coughlin, Jamie Farmer, Chris Filachek, Mark Gambino, Bradd Kadlecik, Colette A. Manoni, David McCreedy, Carolyn Weiss, Josh Wisniewski, IBM Redbooks, 2013-06-28 In a world where product lifespans are often measured in months the IBM Transaction Processing Facility has remained relevant for more than four decades by continuing to process high volumes of transactions quickly and reliably As the title of this book suggests the z/TPF system uses open standard interfaces to create services Integration of new applications with existing z/TPF functions is a key factor in extending application capabilities The ability for service data objects (SDO) to access the z/TPF Database Facility (z/TPFDF) provides a framework for data application program development that includes an architecture and application programming interfaces (APIs) SDO access to z/TPFDF provides remote client applications with access to z/TPF traditional data In the simplest terms service oriented architecture (SOA) is a means by which like or unlike systems can communicate with one another despite differences between each system's heritage SOA can neutralize the differences between systems so that they understand one another SOA support for z/TPF is a means by which z/TPF can interact with other systems that also support SOA This book discusses various aspects of SOA in the z/TPF system including explanations and examples to help z/TPF users implement SOA IBM WebSphere Application Server was chosen as the partner system as a means of demonstrating how a world class transaction server and a world class application server can work together This book shows you how you can exploit z/TPF as a transaction server participating in a SOA structure alongside WebSphere Application Server This IBM Redbooks publication provides an introduction to z/TPF and the technologies critical to SOA z/TPF is positioned as a provider or consumer in an SOA by supporting SOAP processing communication bindings and Extensible Markup Language (XML) An example is used to show how z/TPF can be used both as a Web service provider and as a consumer A second example shows how to use WebSphere Operational Decision Management to apply business rules A third example shows how business event processing can be incorporated in z/TPF applications An example is also used to discuss security aspects including z/TPF XML encryption and the z/TPF WS Security wrapper The main part of the book concludes with a discussion of z/TPF in an open systems environment including examples of lightweight implementations to fit z/TPF such as the HTTP server for the z/TPF system The appendixes include information and examples
