Remote Sensing of Land Cover and Land Use Changes in South and Southeast Asia, Volume 1 Krishna Prasad Vadrevu, Christopher Justice, Garik Gutman, 2025-07-22 South and Southeast Asian countries are experiencing rapid land cover and land use changes LCLUC due to urbanization agricultural expansion deforestation and infrastructure development These changes have far reaching consequences for biodiversity water resources food security and climate regulation underscoring the urgent need for effective monitoring and management strategies Remote sensing data is essential for mapping and monitoring these changes A variety of remote sensing data ranging from coarse to very high resolution can be used to assess land use patterns and quantify changes Volume 1 showcases the practical utility of remote sensing data in various LCLUC studies The book features contributions from the NASA funded South Southeast Asia Research Initiative and collaborators from multiple countries in South and Southeast Asia Key Features Explores the latest methodologies from deep learning to novel data integrations for mapping LCLUC Demonstrates case studies to monitor and map land cover changes

using very high medium and coarse resolution satellite data Highlights the role of remote sensing in integrating biophysical and socioeconomic data Provides case studies on urban expansion deforestation and agricultural intensification Demonstrates advanced remote sensing methods for tracking land use changes Offers insights into sustainable land management using remote sensing and geospatial technologies This book serves as a cornerstone for advancing research and collaboration in the field of remote sensing and land use studies particularly in South and Southeast Asia It will be an invaluable resource for mapping and monitoring professionals including remote sensing experts geographers environmental scientists ecologists and all others involved in land use cover change research

Land-Atmospheric Research Applications in South and Southeast Asia Krishna Prasad Vadrevu,Toshimasa Ohara,Chris Justice,2018-03-26 This edited volume sheds new light on the impact of rapid Land Use Cover Changes LU CC on greenhouse gases GHG s and aerosol emissions in South and Southeast Asia Several countries in South Southeast Asia have the highest population growth rates in the world which is the main cause for LU CC Conversion of dense forests to agricultural areas and then to residential and urban areas is most commonly observed in South Southeast Asian countries with a significant release of GHG s and aerosols The book showcases several case studies on the use of remote sensing and geospatial technologies to quantify biomass burning and air pollution impacts aerosol pollution LU CC and impacts on ecosystem services The book also includes articles on regional initiatives in research capacity building and training The authors of this book are international experts in the field and their contributions highlight significant drivers and impacts of air pollution in South Southeast Asia Readers will discover the latest tools and techniques in particular the use of satellite remote sensing and geospatial technologies for quantifying GHG s aerosols and pollution episodes in this region

Extreme Habitable Environments Madhu Kashyap Jagadeesh,Usha Shekhar,2022-07-07 Extreme Habitable Environments is a book authored with the intention of providing introductory material suitable for those interested in learning about exoplanets The focal point of this book is to expose its readers to the excitement in identifying exoplanets and exploring the possibility of life on them This book offers structured content enriched with graphics flow charts images and worked examples that make reading and learning a delight This book further serves as a hands on perspective of the solar system and exoplanets The first two chapters give a thorough insight into the solar system replete with the dynamics of star and planet formation Exoplanets are introduced in the third chapter Remaining chapters deal with various aspects of exoplanets in a phased manner Every chapter starts with an inspirational quote by a renowned personality Content for every chapter is written in a down to earth style to facilitate readers understanding and appreciation of the fundamental concepts While some topics are basically descriptive others start with a simple concept and progressively become more rigorous and detailed Every effort has been made to make each chapter as complete as possible with a view of inciting curiosity in the minds of the readers and motivating them towards additional knowledge acquisition Numerical exercises are included at the end of relevant chapters to help readers develop independent thinking logical

analysis and deductive skills It is hoped that this book will cater to the needs of students desirous of pursuing research and a career in the field of Exoplanets Local Content and Sustainable Development in Global Energy Markets Damilola S. Olawuyi, 2021-03-04 Examines critical links between local content requirements and the application of sustainable development treaties in global energy markets **International Aerospace Abstracts** ,1994 **Diamond: Genesis, Mineralogy and Geochemistry** Karen Smit, Steve Shirey, Graham Pearson, Thomas Stachel, Fabrizio Nestola, Thomas Moses, 2023-06-06 Diamond is the record setter in many mineralogical properties such as hardness diffusivity thermal conductivity purity and covalency of bonding Similarly diamond as the premier gemstone of the mantle holds primacy for geological features such as age and depth of origin Diamond was among the first crystalline structures to be solved by X ray diffraction and the first materials measured for their Raman spectrum At more than 80 billion USD in yearly commercial value diamond sets the record for the most traded valuable mineral on the planet Despite its chemical simplicity diamond has been the object of more research effort and had more scientific and popular press pages written about it than any other mineral **Disaster Risk** Irasema Alcántara-Ayala, Christopher Gomez, Ksenia Chmutina, Dewald van Niekerk, Emmanuel Raju, Victor Marchezini, Jake Rom Cadag, JC Gaillard, 2022-10-13 The text offers a comprehensive and unique perspective on disaster risk associated with natural hazards It covers a wide range of topics reflecting the most recent debates but also older and pioneering discussions in the academic field of disaster studies as well as in the policy and practical areas of disaster risk reduction DRR This book will be of particular interest to undergraduate students studying geography and environmental studies science It will also be of relevance to students professionals from a wide range of social and physical science disciplines including public health and public policy sociology anthropology political science and geology

Reactive Transport in Natural and Engineered Systems Jennifer Druhan, Christophe Tournassat, 2020-06-22 Open system behavior is predicated on a fundamental relationship between the timescale over which mass is transported and the timescale over which it is chemically transformed This relationship describes the basis for the multidisciplinary field of reactive transport RT In the 20 years since publication of Review in Mineralogy and Geochemistry volume 34 Reactive Transport in Porous Media RT principles have expanded beyond early applications largely based in contaminant hydrology to become broadly utilized throughout the Earth Sciences RT is now employed to address a wide variety of natural and engineered systems across diverse spatial and temporal scales in tandem with advances in computational capability quantitative imaging and reactive interface characterization techniques The present volume reviews the diversity of reactive transport applications developed over the past 20 years ranging from the understanding of basic processes at the nano to micrometer scale to the prediction of Earth global cycling processes at the watershed scale Key areas of RT development are highlighted to continue advancing our capabilities to predict mass and energy transfer in natural and engineered systems

Trigo-Rodríguez, Maria Gritsevich, Herbert Palme, 2016-12-19 This volume is a compilation of the research presented at the International Asteroid Day workshop which was celebrated at Barcelona on June 30th 2015 The proceedings discuss the beginning of a new era in the study and exploration of the solar system s minor bodies International Asteroid Day commemorates the Tunguska event of June 30th 1908 The workshop s goal was to promote the importance of dealing proactively with impact hazards from space Multidisciplinary experts contributed to this discussion by describing the nature of comets and asteroids along with their offspring meteoroids New missions to return material samples of asteroids back to

Earth such as Osiris REx and Hayabusa 2 as well as projects like AIM and DART which will test impact deflection techniques for Potentially Hazardous Asteroids encounters were also covered The proceedings include both an outreach level to popularize impact hazards and a scientific character which covers the latest knowledge on these topics as well as offering proposals of promising new techniques that will help gain new insights of the properties of these challenging bodies by studying meteoroids and meteorites Asteroids comets meteoroids and meteorites are introduced with descriptions of their nature origin and solar system pathways

An Introduction to Comets Nicolas Thomas, 2020-12-15 Written by a leading expert on comets this textbook is divided into seven main elements with a view to allowing advanced students to appreciate the interconnections between the different elements The author opens with a brief introductory segment on the motivation for studying comets and the overall scope of the book The first chapter describes fundamental aspects most usually addressed by ground based observation The author then looks at the basic physical phenomena in four separate chapters addressing the nucleus the emitted gas the emitted dust and the solar wind interaction Each chapter introduces the basic physics and chemistry but then new specific measurements by Rosetta instruments at comet Churyumov Gerasimenko are brought in A concerted effort has been made to distinguish between established fact and conjecture Deviations and inconsistencies are brought out and their significance explained Links to previous observations of comets Tempel 1 Wild 2 Hartley 2 Halley and others are made The author then closes with three smaller chapters on related objects the loss of comets and prospects for future exploration This textbook includes over 275 graphics and figures most of which are original Thorough explanations and derivations are included throughout the chapters The text is therefore designed to support MSc students and new PhD students in the field wanting to gain a solid overview of the state of the art
