Proceedings of the International Conference on Education Research Reza Hosseini, **The Best Class You Never Taught** Alexis Wiggins, 2017-09-27 The best classes have a life of their own powered by student led conversations that explore texts ideas and essential questions In these classes the teacher s role shifts from star player to observer and coach as the students Think critically Work collaboratively Participate fully Behave ethically Ask and answer high level questions Support their ideas with evidence and Evaluate and assess their own work The Spider Web Discussion is a simple technique that puts this kind of class within every teacher s reach The name comes from the weblike diagram the observer makes to record interactions as students actively participate in the discussion lead and support one another s learning and build community It s proven to work across all subject areas and with all ages and you only need a little know how a rubric and paper and pencil to get started As students practice Spider Web Discussion they become stronger communicators more empathetic teammates better problem solvers and more independent learners college and career ready skills that serve them well in the classroom and beyond Educator Alexis Wiggins provides a step by step guide for the implementation of Spider Web Discussion covering everything from introducing the technique to creating rubrics for discussion self assessment to the nuts and bolts of charting the conversations and using the data collected for formative assessment She also shares troubleshooting tips ideas for assessment and group grading and the experiences of real teachers and students who use the technique to develop and share content knowledge in a way that s both revolutionary and truly inspiring Socio-Life Science and the COVID-19 Outbreak Makoto Yano, Fumihiko Matsuda, Anavaj Sakuntabhai, Shigeru Hirota, 2021-11-30 This open access book presents the first step towards building socio life science a field of science investigating humans in such a way that both social and life scientific factors are integrated Because humans are both living and social creatures a human action can never be understood fully without knowing both the biological traits of a person and the social scientific environments in which he exists With this consideration the editors of this book have initiated a research project promoting a deeper and more integrated understanding of human behavior and human health This book aims to show what can and could be achieved through our interdisciplinary project One important product is the newly formed three party collaboration between Pasteur Institut Kyoto University and the Research Institute of Economy Trade and Industry Covering many different fields including medicine epidemiology anthropology economics sociology demography geography and policy researchers in these institutes and many others present their studies on the COVID 19 pandemic Although based on different methodologies the studies show the importance of behavioral change and governmental policy in the fight against a huge pandemic The book explains the unique genome cohort panel data that the project builds to study social and life scientific aspects of humans **"I Love Learning; I Hate School"** Susan D. Blum, 2016-01-13 Frustrated by her students performance her relationships with them and her own daughter s problems in school Susan D Blum a professor of

anthropology set out to understand why her students found their educational experience at a top tier institution so profoundly difficult and unsatisfying Through her research and in conversations with her students she discovered a troubling mismatch between the goals of the university and the needs of students In *I Love Learning I Hate School* Blum tells two intertwined but inseparable stories the results of her research into how students learn contrasted with the way conventional education works and the personal narrative of how she herself was transformed by this understanding Blum concludes that the dominant forms of higher education do not match the myriad forms of learning that help students people in general master meaningful and worthwhile skills and knowledge Students are capable of learning huge amounts but the ways higher education is structured often leads them to fail to learn More than that it leads to ill effects In this critique of higher education infused with anthropological insights Blum explains why so much is going wrong and offers suggestions for how to bring classroom learning more in line with appropriate forms of engagement She challenges our system of education and argues for a reintegration of learning with life

The Global Testing Culture William C. Smith,2016-01-04 The past thirty years have seen a rapid expansion of testing exposing students worldwide to tests that are now more than ever standardized and linked to high stakes outcomes The use of testing as a policy tool has been legitimized within international educational development to measure education quality in the vast majority of countries worldwide The embedded nature and normative power of high stakes standardized testing across national contexts can be understood as a global testing culture The global testing culture permeates all aspects of education from financing to parental involvement to teacher and student beliefs and practices The

reinforcing nature of the global testing culture leads to an environment where testing becomes synonymous with accountability which becomes synonymous with education quality Underlying the global testing culture is a set of values identified from the increasing literature on world culture These include education as a human right academic intelligence faith in science decentralization and neoliberalism Each of these values highlights different aspects of the dialogue in support of high stakes standardized testing The wide approval of these values and their ability to legitimate various aspects of high stakes testing reinforces the taken for granted notion that such tests are effective and appropriate education practices However a large body of literature emphasizes the negative unintended consequences teaching to the test reshaping the testing pool the inequitable distribution of school resources and teachers attention and reconstructing the role of the student teacher and parent commonly found when standardized census based tests are combined with high stakes outcomes for educators or students This book problematizes this culture by providing critical perspectives that challenge the assumptions of the culture and describe how the culture manifests in national contexts The volume makes it clear that testing per se is not the problem Instead it is how tests are administered used or misused and linked to accountability that provide the global testing culture with its powerful ability to shape schools and society and lead to its unintended undesirable consequences
