Why Are Our Babies Dying? Sandra Lane, 2015-12-03 Syracuse New York in the late 1980s led U S cities in African American infant deaths Even today in this all American city infants of color die more than two times as often as white babies Infant mortality is too often addressed as if it were an isolated problem rather than part of a systemic and repeating pattern of embedded racism and structural violence The clearing of whole neighborhoods during urban renewal coupled with the collapse of industry brought unintended consequences Dilapidated rental housing abandoned houses and empty lots provide the conditions for lead poisoning gonorrhea and illicit drug use Inadequate education

unemployment and racially biased arrest and sentencing underpin the epidemic of African American male incarceration Inmate fathers cannot provide financial support and only limited emotional support during collect calls from jail or prison Supermarkets fled the inner city where corner stores sell cigarettes malt liquor lottery tickets and drug paraphernalia in place of healthy food The stories and the data in this book show that low birth weight premature birth and infant death are a part of life patterns resulting from systemic discrimination increasing risk over a lifetime and in some cases reaching the next generation

Who Wrote This? Naomi S. Baron, 2023-09-12 Would you read this book if a computer wrote it Would you even know And why would it matter Today's eerily impressive artificial intelligence writing tools present us with a crucial challenge As writers do we unthinkingly adopt AI's time saving advantages or do we stop to weigh what we gain and lose when heeding its siren call To understand how AI is redefining what it means to write and think linguist and educator Naomi S Baron leads us on a journey connecting the dots between human literacy and today's technology From nineteenth century lessons in composition to mathematician Alan Turing's work creating a machine for deciphering war time messages to contemporary engines like ChatGPT Baron gives readers a spirited overview of the emergence of both literacy and AI and a glimpse of their possible future As the technology becomes increasingly sophisticated and fluent it's tempting to take the easy way out and let AI do the work for us Baron cautions that such efficiency isn't always in our interest As AI plies us with suggestions or full blown text we risk losing not just our technical skills but the power of writing as a springboard for personal reflection and unique expression Funny informed and conversational Who Wrote This urges us as individuals and as communities to make conscious choices about the extent to which we collaborate with AI The technology is here to stay Baron shows us how to work with AI and how to spot where it risks diminishing the valuable cognitive and social benefits of being literate
