The Fuzzy and the Techie Scott Hartley, 2017-04-25 Artfully explains why it is time for us to get over the false division between the human and the technical Tim Brown CEO of IDEO and author of Change by Design Scott Hartley first heard the terms fuzzy and techie while studying political science at Stanford University If you majored in humanities or social sciences you were a fuzzy If you majored in computer or hard sciences you were a techie While Silicon Valley is generally considered a techie stronghold the founders of companies like Airbnb Pinterest Slack LinkedIn PayPal Stitch Fix Reddit and others are all fuzzies in other words people with backgrounds in the liberal arts In this brilliantly counterintuitive book Hartley shatters assumptions about business and education today learning to code is not enough The soft skills curiosity communication and collaboration along with an understanding of psychology and society's gravest problems are central to why technology has value Fuzzies are the instrumental stewards of robots artificial intelligence and machine learning They offer a human touch that is of equal if not greater importance in our technology led world than what most techies can provide For anyone doubting whether a well rounded liberal arts education is practical in today's world Hartley's work will come as an inspiring revelation Finalist for the 2016 Financial Times McKinsey Bracken Bower Prize and A Financial Times Business Book of the Month

Appearance in Reality John Heil, 2021 How does the way things appear to us relate to the way things really are Science tells us that the world is very different from the way we experience it John Heil offers an explanation of why the

scientific image of the world that we get from physics is our best guide to the nature of reality to what the appearances are appearances of *Rethinking Research Methods in an Age of Digital Journalism* Michael Karlsson, Helle Sjøvaag, 2018-10-18

The digital infrastructure of media production dissemination and consumption is becoming increasingly complex presenting the challenge of how we should research the digital journalism environment Digital journalism takes many forms we therefore need to revise improve adjust and even invent methods to understand emerging forms of journalism In this book scholars at the forefront of methodological innovations in digital journalism research share their insights on how to collect process and analyse the diverse expressions of digital journalism including online news search results hyperlinks and social media posts As digital journalism content often comes in the form of big data many of these new approaches depart from the traditional methods used in media research in significant ways As we move towards new ways of understanding digital journalism the methods developed for such purposes also need to be grounded in scientific rigour This book aims to share some of the emerging processes by which these methods tools and approaches are designed implemented and validated As such this book not only constitutes a benchmark for thinking about research methods in digital journalism it also provides an entry point for graduate students and seasoned scholars aiming to do research on digital journalism This book was originally published as a special issue of Digital Journalism [Pandora's Gamble](#) Alison Young, 2023-04-25 Named to Kirkus Reviews Best Books of 2023 A remarkable book The New York Times This fearless deeply reported book about laboratory accidents asks the haunting question some elite scientists don't want the public to entertain Did the COVID 19 pandemic start with a lab leak in Wuhan China This is an obvious question Yet there's been an extraordinary effort by government officials in China as well as leading scientific experts in the United States and around the world to shut down any investigation or discussion of the lab leak theory In private however some of the world's elite scientists have seen a lab accident as a very real and horrifying possibility They know what the public doesn't Lab accidents happen with shocking frequency Even at the world's best run labs That's among the revelations from Alison Young the award winning investigative reporter who has spent nearly 15 years uncovering shocking safety breaches at prestigious U.S. laboratories for USA Today and other respected news outlets In Pandora's Gamble Young goes deep into the troubling history and enormous risks of leaks and accidents at scientific labs She takes readers on a riveting journey around the world to some of the worst lab mishaps in history including the largely unknown stories of the lab workers at the U.S. Army's Camp Detrick who suffered devastating infections at alarming rates during World War II And her groundbreaking reporting exposes for the first time disturbing new details about recent accidents at prestigious laboratories and the alarming gaps in government oversight that put all of us at risk Sourced through meticulous reporting and exclusive interviews with key players including Dr Anthony Fauci former CDC Director Tom Frieden and others Young's examination reveals that the only thing rare about lab accidents is the public rarely finds out about them Because when accidents happen powerful people and institutions often work hard to keep the information
