A Handbook of Latinx Art Rocío Aranda-Alvarado,Deborah Cullen-Morales,2025-02-25 A curated selection of key texts and artists voices exploring US Latinx art and art history from the 1960s to the present A Handbook of Latinx Art is the first anthology to explore the rich deep and often overlooked contributions that Latinx artists have made to art in the United States Drawn from wide ranging sources this volume includes texts by artists critics and scholars from the 1960s to the present that reflect the diversity of the Latinx experience across the nation from the West Coast and the Mexican border to New York Miami and the Midwest The anthology features essential writings by Mexican American Puerto Rican Cuban American Dominican American and Central American artists to highlight how visionaries of diverse immigrant groups negotiate issues of participation and belonging material style and community in their own voices These intersectional essays cut across region gender race and class to lay out a complex emerging field that reckons with different histories geographies and political engagements and ultimately underscores the importance of Latinx artists to the history of American art How and Why Does Spatial-Hearing Ability Differ among Listeners? What Is the Role of Learning and Multisensory Interactions? Guillaume Andéol,Brian D. Simpson,Ewan A. Macpherson,2016-08-29 Spatial hearing ability has been found to vary widely across listeners A survey of the existing auditory space perception literature suggests that three main types of factors may account for this variability physical factors e g acoustical characteristics related to sound localization cues perceptual factors e g sensory cognitive processing perceptual learning multisensory interactions and methodological factors e g differences in stimulus presentation methods across studies However the extent to which these and perhaps other still unidentified factors actually contribute to the observed variability in spatial hearing across individuals with normal hearing or within special populations e g hearing impaired listeners remains largely unknown Likewise the role of perceptual learning and multisensory interactions in the emergence of a multimodal but unified representation of auditory space is still an active topic of research A better characterization and understanding of the determinants of inter individual variability in spatial hearing and of its relationship with perceptual learning and multisensory interactions would have numerous benefits In particular it would enhance the design of rehabilitative devices and of human machine interfaces involving auditory or

multimodal space perception such as virtual auditory multimodal displays in aeronautics or navigational aids for the visually impaired For this Research Topic we have considered manuscripts that present new methods or review existing methods for the study of inter individual differences present new data or review existing data concerning acoustical features relevant for explaining inter individual differences in sound localization performance present new or review existing psychophysical or neurophysiological findings concerning spatial hearing and or auditory perceptual learning and or multisensory interactions in humans normal or impaired young or older listeners or other species discuss the influence of inter individual differences on the design and use of assistive listening devices rehabilitation or human machine interfaces involving spatial hearing or multimodal perception of space ergonomics *Literature* ,1958 *Is Shakespeare any Good?* Richard Bradford,2015-11-02

Is Shakespeare any Good reveals why certain literary works and authors are treated as superior to others and questions the literary establishment's criteria for creating an imperium of great writers Enables readers to articulate and formulate their own arguments about the quality of literature including works that convention forbids us to dislike Dismantles the claims of academic criticism particularly Theory to tell us anything useful about why we like or appreciate literature Challenges and shatters many longstanding beliefs about literature and its evaluation Poses serious questions about the value of literature and studying literature and presents these in a lively and entertainingly provocative manner **Curious Questions in History, Literature, Art, and Social Life** Sarah Hutchins Killikelly,1896
