States of Matter: Solid, Liquid, Gas

In the world around us, everything is made up of tiny particles called molecules. These molecules are always present in different ways to create three main states of matter: solid, liquid and gas. Each has some different characteristics and they change between them.

Solid: Imagine a brick or a box. Solids are made of many, many tiny particles. These tiny particles are packed very closely together. They are held together by strong forces, and this is why solids have a fixed shape.

Liquid: Now think about water. It flows and takes the shape of its container. In liquids, the molecules are not packed as closely together as in solids. They can move around a bit, but they are still held together by strong forces. This is why liquids have a fixed volume but no fixed shape.

Gas: Think of the air you breathe. It fills all around you, but you can't touch it. Gases have molecules that are spread out far from each other. They fill up the space around them. There are no fixed shape or volume problems, and the molecules are not held together by strong forces. This is why gases have no fixed shape or volume.

Changing States: Have you ever seen ice melting? Or water boiling? Or steam rising from a kettle? These are all changes between the states of matter. When a solid melts, it becomes a liquid. When a liquid boils, it becomes a gas. When a gas cools, it becomes a liquid. When a liquid freezes, it becomes a solid. These changes are called phase changes.

During these phase changes, the molecules are not destroyed. They are just moving around differently. For example, when ice melts, the water molecules are still there, but they are moving more freely. When water boils, the water molecules are still there, but they are moving even more freely.

So, the next time you see a solid, a liquid, or a gas, think about the tiny particles that are making it up. They are always there, and they are always moving. That's why the world around us is so interesting!

Now, let's look at the questions and see if you can answer them. Remember, the answer key is at the end of the worksheet.
