Focusing on six themes: strategic view, training paradigm, training model types, training rubrics, and andragogy (a theory focused specifically on the adult learner), the author offers an applied approach to designing and implementing a training program. Readers will learn about different types of training programs ranging from simple to complex, while a model program design demonstrates the critical elements associated with designing a program, such as subjects, time frame, learning objectives, and more. Practical exercises and thought-provoking end-of-chapter questions help students learn how to apply the concepts successfully, while Chapter Twelve specifically includes a variety of practical exercises for use in application-oriented assignments.
