ROI for Technology Projects D. Brian Roulstone, Jack J. Phillips, 2008. With increased scrutiny of technology spending by the most complex organizations in the world, technology leaders need a tool kit to help them prepare for hard-hitting discussions with their organization's CFO, president, CEO, or chairman about the return they should expect from critical technology projects. Rather than focusing top managers' attention on cutting, challenging, and controlling expenditures, as many C-level accountants prefer to do, this approach guides technology managers in providing executives with more comprehensive, balanced information that helps all involved make better business decisions. Along the way, it helps technology managers communicate more effectively with the financial decision makers in their organizations.
