

6th Grade Argumentative Essay Example

Topic: Student/Youth Environmental Activism

Issues like climate change, the loss of biodiversity and deforestation are causing a lot of problems on the planet. The environmental crisis seems like it is getting worse, so some students are taking action by skipping school to protest and strike for climate and the environment, but this is not a realistic method for change. In my opinion, students should not be environmental activists.

First, students should not be environmental activists because it keeps them from learning essential information in school. According to the *Minnesota* article, "Young People Urged . . .," students from "more than 150 students skipped school" to participate in "another series of worldwide protests." But, even though protesting seems like a good way to bring awareness to the issues our world is experiencing with climate, students should not be giving up their time in school. When students are in school, they learn how to speak and write better and might learn more about ways to help the environment. This means that without the time in school to learn all of that adequate, protesters are just potentially uneducated and untrained students, which will not get them far.

Secondly, students should not be environmental activists because at this point, it is too late to reverse the effects of climate change. In the article from *Environmental Technology*, " . . . Top 5 Environmental Concerns . . ." it states that a "recent United Nations report" said that if we do not make revolutionary changes with human behavior, the "planet will suffer dramatically from global warming in just 12 years." This proves that humans really do not have enough time to change our fate. With most people being selfish and stuck in the ways of being greedy and not caring for the environment, it would take a lot longer than a decade to change the minds and behaviors of the people on Earth. People here are not concerned about the future. They are concerned about living now. There is no changing their minds.

Lastly, students should not be environmental activists, because humans are stronger than climate change. In an opinion piece for the *Boston Herald*, Rich Lowry says that, eventually, the youth climate protesters "will grow up, even in a warming world." This builds on the idea that humans have adapted to the changes in the world's climate since our beginnings here on Earth. We will continue to evolve. The human race is strong and our species is intelligent enough to overcome the Earth's changes. So, students do not need to be activists, because we will figure it out naturally.

In conclusion, students should not be environmental activists, because students belong in school so they can learn and grow, there is not much we can do to reverse the effects of climate change, and humans will adapt to our new climate, just as we have always done. There is no reason for students to be activists, but that does not mean people should not still try to care about the environment by keeping it clean through recycling, composting and reusing items as often as we can.
