The Shifting Global World of Youth and Education Mabel Ann Brown, 2017-08-15 The Shifting Global World of Youth and Education explores how increasing migration and population changes are having an unprecedented impact on global education. Given that the number of children of migrant background is growing internationally, there is a need for increasing awareness of the educational attainment and cultural integration of this population group. This book presents international perspectives on migration and youth and analyses what kinds of effects such demographic changes are having on educational systems around the world. The chapters in this volume provide a fascinating insight into how countries around the world are dealing with loss or growth in their young population as well as changes to their education systems. Written by specialist academics from the relevant country, the book covers Cuba, Lithuania, the United Kingdom, the United States, Finland, Greece, Germany, Austria, Hungary, Latvia, China, Australia, India, Italy, and Poland. Taking into consideration the countries' social and political context, the chapters discuss educational issues surrounding curriculum, assessment, and the opportunities available for the support of young people. Conclusions are drawn about what could be done in the future for the benefit of both the migrant and the existing populations. The Shifting Global World of Youth and Education will be of great interest to academics, researchers, and postgraduate students in the disciplines of education, sociology, political sciences, and social work. The book will also give secondary teachers, teaching assistants, social workers, and youth workers the opportunity to reflect on their role within a national and international context.

Active Learning: Theoretical Perspectives, Empirical Studies and Design Profiles Robert Cassidy, Elizabeth S. Charles, James D. Slotta, Nathaniel Lasry, 2019-07-11 This book represents the emerging efforts of a growing international network of researchers and practitioners to promote the development and uptake of evidence-based pedagogies in higher education at something of a level approaching large-scale impact. By offering a communication venue that attracts and enhances much-needed partnerships among practitioners and researchers in pedagogical innovation, we aim to change the conversation and focus on how we work and learn together, i.e., extending the implementation and knowledge of co-design methods. In this first edition of our Research Topic on Active Learning, we highlight two of the three types of publications we wish to promote. First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community. These types of studies constitute the practice pull that we see as a necessary counterbalance to knowledge push in a more productive pedagogical innovation ecosystem based on research-practitioner partnerships. Second are studies empirically examining the implementations of evidence-based designs in naturalistic settings.

and under naturalistic conditions Interestingly the teams conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely positioned as in between straddling the two worlds As a result these publications represent both the rigours of research and the pragmatism of reflective practice In forthcoming editions we will add to this collection a third type of publication design profiles These will present practitioner developed pedagogical designs at varying levels of abstraction to be held to scrutiny amongst practitioners instructional designers and researchers alike We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner researcher interactions that promote co design in pedagogical innovation
