**Topic: World population growth**

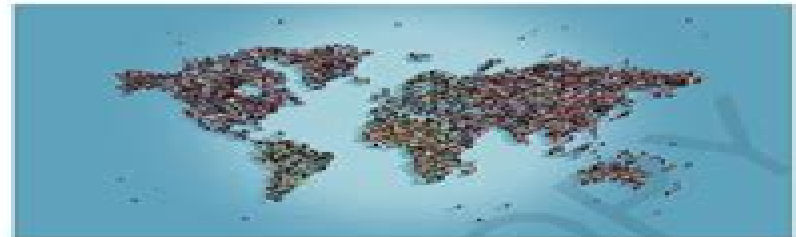

The world's population is growing faster than ever before. A recent study by The Lancet contradicts the UN forecast that there will be 11.2 billion people on the planet by the year 2100. According to the prestigious journal, the growing trend will peak in 2060 and then fall to 8.8 billion in 2100. The reason?

The developments and events that have affected population growth can be divided into THREE categories:

1. Industrial revolution
2. Green revolution
3. Medical revolution

**Instructions:**

1. Work in groups of THREE
2. Choose one of these revolutions and do research on what is making our population grow faster than ever before?
3. You will need to present your findings in a PowerPoint Presentation format of no less than 8 slides and more than 10 slides.
4. You need to do enough research to show us why your findings are changing the world.
5. Remember to add pictures for explanation purposes.
