In responding to an emergency they lack a developed forecast primarily use manual requisitioning systems and do not possess sophisticated means to sense and respond to the rapidly emerging and changing demand. Multiple stakeholders come together many for the first time to execute on the fly. As a result supply chain efficiency is an afterthought and optimization is difficult if not undesired. This book completes the education of both practitioners and academics across multiple domains and disciplines. It contributes to military and nongovernmental operators, logisticians and organizations understanding of emergency supply chain strengths and vulnerabilities. Similarly emergency management professionals will gain a sense of how these supply chains accomplish limit or constrain the emergency management process.
