Open Learning as a Means of Advancing Social Justice Tabisa Mayisela, Shanali Govender, 2024-01-23 This volume investigates the uptake of open learning in South African Technical Vocational Education and Training TVET colleges and higher education institutions Comprised of 16 studies focused on activities at a range of colleges and universities across the country these chapters aim to promote a better understanding of open learning practices across the Post School Education and Training PSET sector including issues such as recognition of prior learning access for students with disabilities work integrated learning professional development novel student funding mechanisms leadership for open educational practices institutional culture student support blended and online learning flexible learning online assessment open educational resource development models and funding and micro credentials This collection of peer reviewed chapters contributes to understanding the ways in which South African PSET institutions and educators are interpreting open learning as a means of advancing social justice It includes a historical and contemporary understanding of the economic cultural and political obstacles facing PSET drawing on Nancy Fraser s theory of social justice as participatory parity to better understand the ways in which open learning may address systemic social injustices in order to allow South African students and educators to thrive This volume emerges from research conducted by the Cases on Open Learning COOL project an initiative by the Department of Higher Education and Training in partnership with the Centre for Innovation in Learning and Teaching CILT at the University of Cape Town UCT in South Africa

Achieving Nelson Mandela University? Sibongile Muthwa, Denver A. Webb, 2024-08-20 South Africa s higher education sector is rooted in the country s divided past A significant State driven restructuring from around 1997 to 2005 resulted in what is largely the current configuration of public universities But just over two decades later for a variety of reasons the higher education sector in South Africa appears beset with numerous challenges Nelson Mandela University is one of the public universities that emerged from the restructuring process The university is in an ongoing state of evolution of becoming It developed out of the amalgamation of the University of Port Elizabeth Port Elizabeth Technikon and incorporation of the Port Elizabeth campus of Vista University as Nelson Mandela Metropolitan University in 2005 In 2017 it was renamed Nelson Mandela University after the world renowned statesman rather than the metropolitan area in which the university is primarily located The renaming was conceptualised as more than a marketing opportunity to rebrand the university but as an opportunity to reorientate the university to reposition Nelson Mandela University as an engaged and socially embedded university in the service of society striving to be the academic expression of the values and ethos of its iconic namesake Endeavouring to be something greater and different from the norm imbues its strategy public statements and practices The determination to achieve Mandela University serves or is intended to serve as both an organising principle and a lodestar A cross section of writers from different backgrounds situates Nelson Mandela University within the contemporary historical moment from which it emerged and examines its subsequent

evolution While Nelson Mandela University has performed the usual work expected of any university it has also sought to turn the university outwards to achieve a higher purpose framing itself as a values based university on a journey to become something else In Achieving Nelson Mandela University the university attempts to give an account of itself The book is an intellectual and scholarly reflection on where the university has come from and where it is seeking to go The Globalization of Internationalization Hans de Wit,Jocelyne Gacel-Ávila,Elspeth Jones,Nico Jooste,2017-01-20 The Globalization of Internationalization is a timely text which gives voice to emerging perspectives as an increasing range of countries engage in the process of internationalization The pressure to internationalize cannot be ignored by institutions anywhere in today s world yet the dominant paradigms in the conception of internationalization traditionally come from the English speaking world and Western Europe This book sets out to offer alternative viewpoints Different dimensions and interpretations of internationalization in countries and regions whose perspectives have received little attention to date provide food for thought and help to broaden understanding of its application in alternative contexts Combining diverse perspectives from around the world this new volume in the Internationalization in Higher Education series seeks answers to key questions such as What are the main characteristics of internationalization viewed from different cultural and regional backgrounds and how do they differ from traditional models such as in Western Europe North America and Australasia What issues in different global contexts have an impact on internationalization processes What are the key challenges and obstacles encountered in developing innovative and non traditional models of internationalization With contributions from world renowned international authors and perspectives from countries and contexts seen only rarely in the literature The Globalization of Internationalization offers distinctive overviews and insights while exploring a range of thematic and regional issues arising from these considerations This will be essential reading both as an academic resource and a practical manual for university leaders academics higher education policy advisers and non governmental organizations which fund higher education Anchored in Place Leslie Bank,Nico Cloete,2018-11-05 Tensions in South African universities have traditionally centred around equity particularly access and affordability historical legacies such as apartheid and colonialism and the shape and structure of the higher education system What has not received sufficient attention is the contribution of the university to place based development This volume is the first in South Africa to engage seriously with the place based developmental role of universities In the international literature and policy there has been an increasing integration of the university with place based development especially in cities This volume weighs in on the debate by drawing attention to the place based roles and agency of South African universities in their local towns and cities It acknowledges that universities were given specific development roles in regions homelands and towns under apartheid and comments on why sub national place based development has not been a key theme in post apartheid higher education planning Given the developmental crisis in the country universities could be expected to play a more constructive and meaningful role in the development of

their own precincts cities and regions But what should that role be Is there evidence that this is already occurring in South Africa despite the lack of a national policy framework What plans and programmes are in place and what is needed to expand the development agency of universities at the local level Who and what might be involved Where should the focus lie and who might benefit most and why Is there a need perhaps to approach the challenges of college towns secondary cities and metropolitan centers differently This book poses some of these questions as it considers the experiences of a number of South African universities including Wits Pretoria Nelson Mandela University and especially Fort Hare as one of its post centenary challenges

Food Sovereignty and Urban Agriculture Anne Siebert,2022-07-08 This book analyses the interplay of urban agriculture and food sovereignty through the innovative lens of the critical urban food perspective It focuses on the mobilisation of urban food producers as a powerful response to highly exclusionary dynamics in the agri food system including insufficient food access and disastrous land dispossessions This volume particularly aims to fill the gap in the current literature by engaging with food sovereignty discourses and movements in urban areas Related activism of urban food producers in the Global South remains underrepresented in practice and in literature Therefore this book engages with the lived realities of an urban agriculture initiative in George South Africa Building on theoretical notions of the right to the city and everyday forms of resistance the book illuminates how deprived food producers expose inequalities and propose alternatives The findings of in depth empirical research reveal that dwellers perceive farming as a mean to overcome historical segregation high food prices and unhealthy nutrition Hence they breathe life into food sovereignty in practice and suggest further alliances beyond the city The book will be of interest to scholars and students of alternative food politics agrarian transformation and food movements as well as rural urban intersections

Nanotechnology in Catalysis Bert Sels,Marcel Van de Voorde,2017-06-20 Reflecting the R D efforts in the field that have resulted in a plethora of novel applications over the past decade this handbook gives a comprehensive overview of the tangible benefits of nanotechnology in catalysis By bridging fundamental research and industrial development it provides a unique perspective on this scientifically and economically important field While the first three parts are devoted to preparation and characterization of nanocatalysts the final three provide in depth insights into their applications in the fine chemicals industry the energy industry and for environmental protection with expert authors reporting on real life applications that are on the brink of commercialization Timely reading for catalytic chemists materials scientists chemists in industry and process engineers

Global Child Myriam Denov, Claudia Mitchell, Marjorie Rabiau, 2023-01-13 Armed conflicts continue to wreak havoc on children and families around the world with profound effects In 2017 420 million children nearly one in five were living in conflict affected areas an increase in 30 million from the previous year The recent surge in war induced migration referred to as a global refugee crisis has made migration a highly politicized issue with refugee populations and host countries facing unique challenges We know from research related to asylum seeking families that it is vital to think about children and families in relation to what it means to stay together what it means for parents to be separated from their

children and the kinds of everyday tensions that emerge in living in dangerous insecure and precarious circumstances In Global Child the authors draw on what they have learned through their collaborative undertakings and highlight the unique features of participatory arts based and socio ecological approaches to studying war affected children and families demonstrating the collective strength as well as the limitations and ethical implications of such research Building on work across the Global South and the Global North this book aims to deepen an understanding of their tri pillared approach and the potential of this methodology for contributing to improved practices in working with war affected children and their families

African Studies in the Academy Mawere, Munyaradzi, Mubaya, Tapuwa R., 2017-08-09 For a long time African Studies as a discipline has been spearheaded by academics and institutions in the Global North This puts African Studies on the continent at a crossroads of making choices on whether such a discipline can be legitimately accepted as an epistemological discipline seeking objectivity and truth about Africa and the African peoples or a discipline meant to perpetuate the North s hegemonic socio economic political and epistemic control over Africa The compound question that immediately arises is Who should produce what and which space should African Studies occupy in the academy both of the North and of the South Confronted by such a question one wonders whether the existence of African Studies Centres in the Global North academics open opportunities for critical thinking on Africa or it opens possibilities for the emergence of the same discipline in Africa as a fertile space for trans disciplinary debate While approaches critical for the development of African Studies are pervasive in African universities through fields such as cultural studies social anthropology history sociology indigenous knowledge studies and African philosophy the discipline of African Studies though critical to Africa is rarely practiced as such in the African academy and its future on the continent remains bleak African Studies in the Academy is a testimony that if honestly and objectively practiced the crossroads position of African Studies as a discipline makes it a fertile ground for generating and testing new approaches critical for researching and understanding Africa It also challenges Africa to seriously consider assuming its legitimate position to champion African Studies from within These issues are at the heart of the present volume
