Occupation Analysis in Practice Lynette Mackenzie, Gwyn O'Toole, 2011-03-23 Occupation Analysis in Practice is the

essential book for all future and current occupational therapists. It offers a practical approach to the analysis of occupations in real world practice. The book frames occupation as the key component for analysis and builds upon previous work limited to analysis at the activity level. It examines the interests, goals, abilities, and contexts of individuals, groups, institutions, and communities along with the demands of the occupation. It presents examples of occupation analysis in different practice contexts including working with children, health promotion, indigenous health, medico-legal practice, mental health, and occupational rehabilitation. The book has four sections. Section 1 introduces theoretical perspectives of the concept of occupation analysis and how such analysis relates to particular models of Occupational Therapy practice and the generic World Health Organisation International Classification of Functioning, Disability and Health. Section 2 discusses analysis of particular components of occupation that support practice. These include culture, spirituality, home, and community environments as well as self care and leisure. Section 3 applies analysis of occupations to particular specialties encountered in practice. Section 4 considers the application of Occupation Analysis within professional reasoning and goal setting. FEATURES: International team of contributors. Examples of occupation analysis proforma. Application to a wide range of practice areas. Glossary of key terms. Includes the International Classification of Functioning, Disability and Health.

Enhancing Women's Wellbeing During Matrescence, Motherhood, and Perinatal Transitions Hannah Slootjes, 2025-09-01. Guided by research and occupational therapy practices, this evidence-based text maps how occupational therapists and the allied health collective can holistically promote women's health, wellbeing, and self-efficacy during matrescence, the bio-psycho-social-political-spiritual developmental journey and rite of passage of mother becoming. From person-centred, gender-sensitive, and feminist perspectives, this book introduces a compassionate and non-medicalised framework guiding how health and wellbeing professionals can engage responsively with women during motherhood journeys. Building on doctoral research exploring the role of occupational therapists in perinatal health, this guide includes occupation and co-occupation based theories, models, and frameworks for supporting women's transitions and transformations as individuals and mother-infant dyads. Bolstered by learning objectives, case studies, summaries, and reflective questions, the chapters feature a collection of innovative occupational therapy approaches to support women struggling with overwhelm, burnout, and other common normalised issues across the lifespan from womanhood to grandmotherhood and menstruation to menopause. Further, the book sheds light on the dark side of motherhood, outlining holistic strategies to promote functional capacities, empowering and enabling women to work through the impacts of role overloading, disrupted identity, shame, dysfunction, and perinatal trauma. A much-needed addition to the perinatal care field, this essential guide is tailored for occupational therapy, mental health, and other healthcare practitioners and postgraduate students working in perinatal health and matrescence.
