Developing Narrative Comprehension Ute Bohnacker,Natalia Gagarina,2020-12-15 Comprehension of texts and understanding of questions is a cornerstone of successful human communication Whilst reading comprehension has been thoroughly investigated in the last decade there is surprisingly little research on children s comprehension of picture stories particularly for bilinguals This can be partially explained by the lack of cross culturally robust cross linguistic instruments targeting early narration This book presents an inference based model of narrative comprehension and a tool that grew out

of a large scale European project on multilingualism Covering a range of language settings the book uses the Multilingual Assessment Instrument for Narratives to answer the question which narrative comprehension skills bilingual children can be expected to master at a certain age and explores how such comprehension is affected or not affected by linguistic and extra linguistic factors Linking theory to method the book will appeal to researchers in linguistics and psychology and graduate students interested in narrative multilingualism and language acquisition
