Database and Expert Systems Applications A Min Tjoa, Isidro Ramos, 2012-12-06

The Database and Expert Systems Application DEXA conferences are mainly oriented to establish a state of the art forum on Database and Expert System applications. But Practice without Theory has no sense as Leonardo said five centuries ago. In this Conference we try a compromise between these two complementary aspects. A total of 5 sessions are application oriented ranging from classical applications to more unusual ones in Software Engineering. Recent research aspects in Databases such as activity deductivity and or Object Orientation are also present in DEXA 92 as well as the implication of the new data models such as OO Model Deductive Model etc included in the Modelling sessions. Other areas of interest such as Hyper Text and Multimedia application together with the classical field of Information Retrieval are also considered. Finally Implementation Aspects are reflected in very concrete fields. A total of of nearly 200 papers submitted from all over the world were sent to DEXA 92. Only 90 could be accepted. A Poster session has also been established. DEXA 90 was held in Vienna Austria. DEXA 91 in Berlin Germany and DEXA 92 will take place in Valencia Spain where we are celebrating the discovery of the New World just five centuries ago in Leonardo's age. Both the quality of the Conference and the compromise between Practice and Theory are due to the credit of all the DEXA 92 authors.
