Accessory: Proprietary ①

Speaker

Install the speaker on the side of the central console, ideally alongside the leg of the passenger sitting beside the driver, as far as possible from the microphone.

Thread the speaker cable under the carpet along the floor of the vehicle.

Plug the speaker cable into the compatible connector in the octopus control cable.

Verify that the cable does not interfere with the proper operation of the vehicle and/or its components.

Do not conceal the speaker behind any obstacle (such as dashboard, carpet or any other barrier) which will result in bad audio quality.

Attention! The speaker and microphone (which is fixed on the sun visor above the driver) should be pointed towards opposite directions to avoid audio speaker noise.

Accessory: Proprietary ④

Head control unit

When installing the head-mount car phone, avoid positioning the head control unit where it may obstruct the proper operation of the vehicle and/or its components, such as air vents, air bags, catalytic converter compartment, engine light, gear stick, hand brake, etc.

Attach the head-mount car phone on a stable surface, in a position that is safe and convenient for the driver to use.

Special warning: Do not position the head control unit in front of the air bag or where it may impact air bag performance, as the air bag might inflate in an accident and cause damage.

Verify that the control unit does not face the sun or source of humidity, such as air conditioner vents.

Make sure the microphone is at a distance of at least 1.5m (4.9 ft) from the speaker and is not directed towards the speaker.

Should another cellular device already be installed in the vehicle, the antenna should be located as far as possible from the antenna of the second cellular device.

Remember: In certain car models (such as "Mercedes/Mercedes" and "Mercedes/Mercedes"), the upper windshield has a radiation filter, and therefore it is necessary to locate the antenna in the side or rear windshield only.

Attention! Do not thread the antenna cable close to the microphone cable to avoid audio interference.

Use original antenna plug and clamping tools only.

Test antenna and cable performance using a VSWR meter.
