

Technical Overview of Piper Alpha

Design and Operational Features

- **Structural Design:** Piper Alpha consisted of four modules separated by firewalls designed to contain outbreaks, but lacked certain safety redundancies and gas detection systems.
- **Operational Systems:** Equipped with complex piping and control systems to manage oil and gas production, the platform had interconnected safety valves which were critical during the disaster.
- **Safety Measures:** Despite having basic safety protocols, the platform's design and operational plans were not fully prepared for the type of disaster that occurred in 1988.

The Routledge Handbook of Law and Death Marc Trabsky, Imogen Jones, 2024-10-01 The Routledge Handbook of Law and Death provides a comprehensive survey of contemporary scholarship on the intersections of law and death in the 21st century. It showcases how socio-legal scholars have contributed to the critical turn in death studies and how the sociology of death has impacted upon the discipline of law. In bringing together prominent academics and emerging experts from a diverse range of disciplines, the Handbook shows how far from shunning questions of mortality, legal institutions incessantly talk about death. Touching upon the epistemologies and materialities of death and problems of contested deaths and posthumous harms, the Handbook questions what is distinctive about the disciplinary alignment of law and death, how law regulates and manages death in the everyday, and how thinking with law can enrich our understandings of the presence of death in our lives. In a time when the world is facing global inequalities in living and dying, and legal institutions are increasingly interrogating their relationships to death, this Handbook makes for essential reading for scholars, students, and practitioners in law, humanities, and the social sciences.
