Designing a Machine

Situation 2 :

You are preparing an outline of the steps to be taken in redesigning a machine. Your initial outline is given below; you are now to change and improve upon it. Some of the possible revisions you might make in this outline are presented in the items following it.

First read the outline; then answer each question by selecting the best of the five choices.

I. Identifying desirable changes

- a. Specification of improved performance and other characteristics desired in the new model.
- b. Evaluation of basic factors limiting the performance of the current model
- c. Description of the current model

II. Determining the feasibility of various desirable changes.

- a. Selecting the most promising ideas for changes.
- b. Collecting ideas regarding possible improvements.
- c. Trying out each of the proposed changes.

III. Developing new model.

- a. Combining old and new elements in a pilot model
- b. Evaluating the pilot model;
 1. Testing the pilot model
 2. Appraising the result

1. Major section II of this outline would be most improved by:

1 point

- ☐ Deleting heading C
- ☒ Reversing the order of headings A and C
- ☐ Making heading C one subheading under A
- ☐ Deleting heading A.
- ☐ Reversing the order of headings A and B.

Development and Field Test of the Trial Battery for Project A ,1987 **Industrial Services Handbook** U.S. Training and Employment Service, Thomas Flanagan, 1970 **Journal of Rehabilitation of the Deaf** ,1979 Applied Measurement Deborah L. Whetzel, George R. Wheaton, 2016-02-17 An updated version of Deborah Whetzel and George

Wheaton's earlier volume this text is a well organized sourcebook for fundamental practices in industrial psychology and human resources management. Applied Measurement describes the process of job analysis and test development with practical examples and discusses various methods for measuring job performance. Its primary purpose is to provide practical systematic guidance on how to develop the various kinds of measurement instruments frequently used in the fields of industrial psychology and human resources management to assess personnel. With easy to follow guidance written in straightforward language, Applied Measurement contains three new chapters focusing on training and experience measures, assessment centers, and methods for defending the content validity of tests. Includes contributions from many prominent researchers in the field, all of whom have had a great deal of applied experience. Begins each chapter with an overview describing the job analysis or measurement method and uses one job, that of an electrician, as an example throughout the book so that readers can easily understand how to apply job analysis data for the purposes of test development and job performance measurement. This practical concise book is recommended for students and entry level practitioners in the fields of industrial psychology and human resources.

The Social Science Encyclopedia Adam Kuper, 2003-12-16. The Social Science Encyclopedia first published in 1985 to acclaim from social scientists, librarians, and students, was thoroughly revised in 1996 when reviewers began to describe it as a classic. This third edition has been radically recast. Over half the entries are new or have been entirely rewritten, and most of the balance have been substantially revised. Written by an international team of contributors, the Encyclopedia offers a global perspective on the key issues within the social sciences. Some 500 entries cover a variety of enduring and newly vital areas of study and research methods. Experts review theoretical debates from neo evolutionism and rational choice theory to poststructuralism and address the great questions that cut across the social sciences: What is the influence of genes on behaviour? What is the nature of consciousness and cognition? What are the causes of poverty and wealth? What are the roots of conflict, wars, revolutions, and genocidal violence? This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society.
