

Lab : Flame Test

Main Idea : Whoops!!! You're crazy teacher got her chemicals mixed up. It's your job to help her figure out which is which. This is what we know:

1. All of the chemicals are salts. A salt is any compound made of chloride (a halogen) and an element from groups 1 and 2 on the periodic table (Alkali & Alkaline Earth metals).
2. Some chemicals can be identified by the flame they produce. All of these compounds are **flammable**, meaning they burn. The different colors of the flames are the results of burning these different compounds.
3. The table to the right lists some chemicals and the colors they produce.

Element	Color
Barium	Yellow-green
Calcium	Orange-red
Copper	Blue-green
Lithium	Crimson Red
Potassium	Pale Violet
Sodium	Yellow
Strontium	Red

Materials : small beaker
paper towels
candle
4 wood splints
aluminum foil for candle wax
safety glasses for everyone
7 small vials of different salts

Safety First!

1. You must wear goggles at all times during the lab – these chemicals sizzle!
2. Do NOT touch the chemicals with your skin or clothing. If you do, wash immediately.
3. Keep hair tied back and sleeves rolled up.
4. Pay attention to what you are doing and to those around you.

Lab Procedures :

1. Read the following directions, #2 - 10, with your group before starting.
2. Fill your beaker with water and place your candle on the foil.
3. Raise your hand to begin. Your teacher will light the candle.
4. Choose one vial of "salt" from the collection. Carefully observe it with your **EYES ONLY**. Write down your observations of its physical properties on the chart.
5. **Predict the flame color** of this salt by recording your prediction on the chart.
6. Carefully have one person from your group dip the end (about 1/2 cm only) of the soaked wooden splint into the chemical so that you've collected a small amount of salt on its tip.
7. Carefully put the salt into the flame. For best results, aim the end of the stick to the side of the flame, rather than directly above it. Look very carefully, the flame will change color around the outside! It will not last long and you may only see it a little bit. **Observe and record the flame color.**
8. Dip the splint in the water. If it was not charred, you may be able to use again. Otherwise, use the other end of the splint for the next vial.
9. Repeat steps 4-8 for each vial of salt.

Clean Up : Throw away all used paper towels and splints. Make sure all vials are sealed tightly and placed back in the plastic bag. Place your candle and foil gently in your tub. Organize, clean counters, check bin back in to your teacher and return to your desk to work on the next few pages. Then, once settled, raise your hand to get a stamp →

SREEKUMAR V T, 2025-02-10 Embark on a transformative journey into the captivating world of analytical chemistry with Sreekumar V T's comprehensive guide *Analytical Chemistry Essentials: A Gateway to High School Mastery*. This meticulously crafted book serves as a roadmap for high school students seeking a profound understanding of analytical chemistry, bridging fundamental concepts to advanced applications.

Key Features:

- Foundations to Advanced Applications:** Delve into the fundamental principles that underpin analytical chemistry, exploring essential techniques such as spectroscopy, chromatography, electrochemistry, and mass spectrometry. Navigate through the complexities of these methodologies, progressing from foundational knowledge to advanced applications.
- Real World Relevance:** Connect theoretical concepts to practical scenarios with a focus on real-world applications. The book emphasizes the pivotal role of analytical chemistry in environmental analysis, biomedical applications, and various industries, fostering an appreciation for the discipline's impact on solving pressing global challenges.
- Hands On Learning:** Through engaging and accessible language, Sreekumar V T encourages hands-on learning experiences. Readers will find practical insights into laboratory techniques, challenges, and triumphs, enhancing their analytical skills and preparing them for future scientific endeavours.
- Comprehensive Review:** The final chapters offer a comprehensive review of the essential concepts covered in the book. Students will reflect on their analytical journey, celebrate achievements, and prepare for the next steps, ensuring a solid foundation for further studies or a career in analytical chemistry.
- Future Trends and Innovations:** Stay ahead of the curve with a dedicated exploration of future trends and innovations in analytical chemistry. Understand emerging technologies, their applications, and the ethical considerations that come with advancements, preparing students for the dynamic landscape of scientific discovery.

Author Expertise: Sreekumar V T, an authority in analytical chemistry, brings a wealth of knowledge and experience to this book. His passion for the subject shines through, making complex concepts accessible and inspiring a new generation of analytical chemists.

Analytical Chemistry Essentials is not just a textbook; it's a gateway to mastery, offering a holistic and immersive learning experience for high school students. Whether you're preparing for advanced studies, aspiring to a career in science, or simply curious about the world of analytical chemistry, this book is your indispensable guide to mastering the essentials and unlocking the boundless potential of this fascinating field.

Breaking Through Katalin Karikó, 2024-10-08 A powerful memoir from Katalin Karikó, winner of the 2023 Nobel Prize in Physiology or Medicine, whose decades-long research led to the COVID-19 vaccines. Katalin Karikó's story is an inspiration. Bill Gates Riveting a true story of a brilliant biochemist who never gave up or gave in. Bonnie Garmus author of *Lessons in Chemistry* A KIRKUS REVIEWS BEST BOOK OF THE YEAR Katalin Karikó has had an unlikely journey. The daughter of a butcher in postwar communist Hungary, Karikó grew up in an adobe home that lacked running water, and her family grew their own vegetables. She saw the wonders of nature all around her and was determined to become a scientist. That determination eventually brought her to the United States, where she arrived as a postdoctoral fellow in 1985 with 1,200 sewn into her toddler's teddy bear and a dream to remake medicine. Karikó worked in

obscurity battled cockroaches in a windowless lab and faced outright derision and even deportation threats from her bosses and colleagues. She balked as prestigious research institutions increasingly conflated science and money. Despite setbacks, she never wavered in her belief that an ephemeral and underappreciated molecule called messenger RNA could change the world. Karik believed that someday mRNA would transform ordinary cells into tiny factories capable of producing their own medicines on demand. She sacrificed nearly everything for this dream, but the obstacles she faced only motivated her, and eventually she succeeded. Karik's three-decade-long investigation into mRNA would lead to a staggering achievement: vaccines that protected millions of people from the most dire consequences of COVID-19. These vaccines are just the beginning of mRNA's potential. Today the medical community eagerly awaits more mRNA vaccines for the flu, HIV, and other emerging infectious diseases. Breaking Through isn't just the story of an extraordinary woman; it's an indictment of closed-minded thinking and a testament to one woman's commitment to laboring intensely in obscurity, knowing she might never be recognized in a culture that is driven by prestige, power, and privilege because she believed her work would save lives.

Carolina Science and Math, Carolina Biological Supply Company, 2003 *Science Teacher Educators as K-12 Teachers*, Michael Dias, Charles J. Eick, Laurie Brantley-Dias, 2013-07-08. Science teacher educators prepare and provide professional development for teachers at all grade levels. They seek to improve conditions in classroom teaching and learning, professional development, and teacher recruitment and retention. *Science Teacher Educators as K-12 Teachers: Practicing What We Teach* tells the story of sixteen teacher educators who stepped away from their traditional role and entered the classroom to teach children and adolescents in public schools and informal settings. It details the practical and theoretical insights that these members of the Association of Science Teacher Educators (ASTE) earned from experiences ranging from periodic guest teaching to full-time engagement in the teaching role. *Science Teacher Educators as K-12 Teachers* shows science teacher educators as professionals engaged in reflective analysis of their beliefs about and experiences with teaching children or adolescents science. With their ideas about instruction and learning challenged, these educators became more aware of the circumstances today's teachers face. Their honest accounts reveal that through teaching children and adolescents, teacher educators can also renew themselves and expand their identities as well as their understanding of themselves in the profession and in relation to others. *Science Teacher Educators as K-12 Teachers* will appeal to all those with an interest in science education, from teacher educators to science teachers as well as teacher educators in other disciplines. Its narratives and insights may even inspire more teacher educators to envision new opportunities to serve teachers, K-12 learners, and the local community through a variety of teaching arrangements in public schools and informal education settings. **Big Book of Home Learning**, Mary Pride, 1991-07.
