Pediatric Nursing provides a solid foundation in obstetrics and pediatric nursing. An easy to follow organization by developmental stages, discussion of disorders by body system from simple to complex, and health to illness, and a focus on family health make it a complete guide to caring for maternity and pediatric patients. Written in a clear, concise style by Gloria Leifer, MA, RN, this edition reflects the current NCLEX test plan with additional material on safety, health promotion, nutrition, and related psychosocial care. Cultural Considerations boxes and a Cultural Assessment Data Collection Tool help in developing individualized plans of care. Updated health promotion content includes Health Promotion boxes focusing on preventive strategies for achieving prenatal wellness, health during pregnancy, postnatal health, and pediatric illness prevention and wellness, including the complete immunization schedules for all ages. Nursing Tips provide information applying to the clinical setting. Objectives are listed in each chapter opener. Key terms include phonetic pronunciations and text page references at the beginning of each chapter. Nursing Care Plans with critical thinking questions help you understand how a care plan is developed, how to evaluate care of a patient, and how to apply critical thinking skills. A companion Evolve website includes animations, videos, answers to review questions, and answer guidelines for critical thinking questions, an English/Spanish audio glossary, critical thinking case studies, and additional review questions for the NCLEX examination.

Medical-surgical Nursing Lois White, Gena Duncan, 2002. Medical Surgical Nursing: An Integrated Approach, 2E, examines all aspects of this nursing field from how and where the health care delivery system is set up to the nurse's role in care related to IV therapy and diagnostic testing to legal and ethical responsibilities, communication, and cultural diversity. This revised edition also includes new chapters covering alternative therapies and responding to emergencies. Case studies, critical thinking questions, and exercises developing care plans encourage students to think beyond the classroom. Full color illustrations, cross referencing between chapters, and suggested resources are among the many features that will appeal to students. Diagnostic tests are listed alphabetically in chart form, making important information about the test, normal values, and nursing responsibilities easy to find. Chapter end critical thinking questions help students apply chapter content. Web Flash box suggests Internet sites students can consult for additional information. Text includes a glossary, a list of abbreviations and acronyms, a listing of the latest NANDA nursing diagnoses, and Standard Precautions.

Item Writing for Nurse Educators Vicki Moran, 2023-07-04. The book provides guidance and direction for any nurse educator teaching in the professional environment and must write questions to evaluate learning. It covers the basics of item writing and leveling of items using Bloom's taxonomy to the learner. In addition, the book provides stem examples and new types of questions expected on the National Council Licensure Examination for both the registered and practical nurse. Finally, case study development and item analysis are presented. Evaluation of student performance by examination is critical in nursing education from undergraduate to continuing education programs. Many faculty have reported learning the item writing process in graduate programs, but it is often lost or not reused. Recent research reports nursing faculty using textbook

questions that have not been validated and security of the questions have been compromised A nursing education profession should have the ability to develop items to validate that learning has occurred The skill is essential to any professional to evaluate the effectiveness of learning Critical thinking is a skill necessary for licensure examinations and students often need assistance to learn this skill to pass the licensure examination and practice as a nurse Therefore faculty need a source to facilitate their development of the learned item writing process to assist learners and prepare them for practice This book is unique in that it addresses the basics and the advanced components In addition the book provides a substantial list of stems and case study ideas Finally the book describes how to use a knowledge based item and develop an item to a higher level of Blooms taxonomy and assists those nursing programs that educate international students to adequately prepare for the student to pass the national licensing examination required to practice in the US and Canada
