Frequency converter and control unit are built in the compressor system.

Smartphone-like operation: Intuitively operable touchscreen on state-of-the-art technology.

Timer with six channels: This can be used to switch the four pressure bands, four potential-free relay contacts or the compressor.

USB port: Updates can be easily uploaded using a USB stick.

Service indication: Maintenance message will be shown when the set operating hour interval is reached or at the latest after one year.

Display of compressor utilization: Recording of operating and load hours as well as the percentage load for compressors with variable speed control.

Control of frequency converters: direct connection via RS-485 bus interface, exchange of information in **plain text**.
