contributing to the creation of employer brands job advertising may justifiably be classified as a paradigm case of persuasion With employer branding being deeply rooted in the values emanating from an organisation the use of linguistic structures communicating or implying the system of attributes and values declared by the employing organisations is a powerful employer branding strategy widely reflected in the corpus Taking into account the interdisciplinary character of the analysis the book will be of interest not only to linguists and business communication scholars but also to human resource management and public relations researchers and practitioners
