Jensen,2011-12-31 Social learning theory has been called the dominant theory of crime and delinquency in the United States yet it is often misrepresented This latest volume in the distinguished Advances in Criminological Theory series explores the impact of this theory Some equate it with differential association theory Others depict it as little more than a micro level appendage to cultural deviance theories There have been earlier attempts to clarify the theory s unique features in comparison to other theories and others have applied it to broader issues These efforts are extended in this volume which focuses on developing applying and testing the theory on a variety of criminal and delinquent behavior It applies the theory to treatment and prevention moving social learning into a global context for the twenty first century This comprehensive volume includes the latest work tests and theoretical advances in social learning theory and will be particularly helpful to criminologists sociologists and psychologists It may also be of interest to those concerned with current issues relating to delinquency drug use abuse and drinking alcohol abuse

Human Intelligence and Medical Illness R. Grant Steen,2009-09-16 As critics will note psychometric tests are deeply flawed Person to person differences in performance on a psychometric test are not informative about many things of great interest An intelligence quotient IQ cannot characterize creativity or w dom or artistic ability or other forms of specialized knowledge An IQ test is simply an effort to assess an aptitude for success in the modern world and individual scores do a mediocre job of predicting individual successes In the early days of psychology tests of intelligence were cobbled together with little thought as to validity instead the socially powerful sought to validate their power and the prominent to rationalize their success In recent years we have ob ated many of the objections to IQ that were so forcefully noted by Stephen Jay Gould in The Mismeasure of Man Nevertheless IQ tests are still flawed and those flaws are hereby acknowledged in principle Yet in the analysis that follows individual IQ test scores are not used rather average IQ scores are employed In many cases though not all an average IQ is calculated from a truly enormous sample of people The most common circ stance for such large scale

IQ testing is an effort to systematically sample all men of a certain age to assess their suitability for service in the military Yet it is useful and prudent to retain some degree of skepticism about the ability of IQ tests to measure individual aptitudes

Glaser, Harold Kalant, Robert E. Popham, Wolfgang Schmidt, Reginald G. Smart, 2013-11-11 Over the last decade the world has experienced a growing interest in problems associated with the nonmedical use of drugs This interest has corresponded to a real growth in the extent diversity and social impact of the use of alcohol and drugs in many societies As a result the amount of research and writing on the subject of drug problems has greatly increased and it has become very difficult for one individual to keep up with all the relevant literature There is thus an acute need in the field for critical reviews that assess current developments and the present series is intended to fill this need The series is not to be an annual review in the usual sense The aim is not to cover all the work reported during the preceding year in relation to a fixed selection of topics Rather it is to present each year evaluative papers on topics in which enough recent progress has been made to alter the general scope in a particular area Owing to the multidisciplinary nature of problems of drug use and dependence the papers published in each volume will be drawn from several disciplines However some volumes may be devoted to one particular problem with individual reviews and papers examining various aspects of it The composition of the editorial board and the international advisory board reflects these objectives The editors are members of the senior scientific staff of the Addiction Research Foundation of Ontario
