## EVIL PRACTICES STILL EXIST IN NEPAL

By Ramesh Poudel

**Dateline**

May 3, 2021

**Location**

Kathmandu: Practicing witchcraft is an evil act punishable by the law of the land. **However** it is widely practiced in rural parts of the country due to superstition, illiteracy, lack of public awareness, poverty and social and economic disparity. Most of the victims of witchcraft are women from humble socio-economic background, single women, differently-abled women, who are subjected to ill-treatment and torture on charges of practicing witchcraft.

Paragraph 1

Use 5-7 transitions. These words are also called linking words.

**Furthermore**, these categories of people are accused of being witches when their neighbors or family members die or fall ill due to whatsoever reasons. **Disappointingly**, The victims are sometimes smeared with soot, forcefully fed human excreta, beaten up, ostracized from the society or in some cases, beaten up to death. Most of the perpetrators include family members, neighbors and witchdoctors and shaman. Even if the victims of the witchcraft allegation are reported to the police, influential local people try to settle the cases within the villages offering them of financial compensation. **Although**

Paragraph 2

law has defined that accusation of witchcraft is a heinous form of violence, such incidents still take place because of unequal power relations between men and women, who are deprived on property rights and access to law.

According to the statistics provided by the Nepal Police, it registered a total of 61 cases of witchcraft accusation and subsequent torture across the country in the fiscal 2020-21, which is an increase by 79.41 per cent compared to 34 cases of witchcraft accusation in the fiscal 2019-20. Police said 80 perpetrators of witchcraft charge-related violence were recorded in this period.

Paragraph 3

Massive public awareness campaign, along with the involvement of witchdoctors and shaman, can help control the cases of witchcraft.

**Moreover**, elected representatives at the local levels can also play a vital role in preventing the witchcraft.

Paragraph 4

**Overall**, since we cannot completely get rid of the witchcraft practice overnight, we need to educate the witchdoctors and shaman so that they can advise the people to visit the health facilities before it is too late.

Paragraph 5

News article is written in **two columns**. This structure (two columns) is usually preferred for **news based writing**. However, it can also be written in **single column**.

*Resistance Advocacy as News* Benjamin Rex LaPoe II, Victoria L. LaPoe, 2018-01-30 *Resistance Advocacy as News* Digital Black Press Covers the Tea Party examines the Black and mainstream press's digital interpretations of the Tea Party during President Barack Obama's first term. The Tea Party narrative and the white ideologies disseminated by conservative groups was and continues to be an intricate story for journalists to tell. This book tracks coverage of the Tea Party from the modern group's beginning in early February of 2009 until two weeks after the 2012 general presidential election in November. While many mainstream journalists either fail to recognize or ignore all together the racial component that the Tea Party poses to Black solidarity, this book shows that Black reporters working for the Black press absolutely recognize the racial component and provide more thorough discussions than their mainstream counterparts. Historically, the Black press has existed to fill holes of misrepresentation in the mainstream press, to that end, this book addresses questions surrounding the ongoing necessity of the Black press and whether our society is postracial. Combining a quantitative analysis of implicit racial frames with a qualitative analysis of resonant myth and providing empirical evidence that Black people still struggle to have their voices heard in the mainstream press.

**Palestine-Israel in the Print News Media** Luke Peterson, 2014-10-24 *Israel Palestine in the Print News Media* *Contending Discourses* is concerned with conceptions of language, knowledge, and thought about political conflict in the Middle East in two national news media communities: the United States and the United Kingdom. Arguing for the existence of national perspectives which are constructed, distributed, and reinforced in the print news media, this study provides a detailed linguistic analysis of print news media coverage of four recent events in the Palestinian-Israeli conflict in order to examine ideological patterns present in print news media coverage. The two news communities are compared for lexical choices in news stories about the conflict, attribution of agency in the discussion of conflict events, the inclusion or exclusion of historical context in explanations of the conflict, and reliance upon essentialist elements during and within print representations of Palestine-Israel. The book also devotes space to first-hand testimony from journalists with extensive experience covering the conflict from within both news media institutions. Unifying various avenues of academic enquiry reflecting upon the acquisition of information and the development of knowledge, this book will be of interest to those seeking a new approach to the Palestinian-Israeli conflict.

**Sampling Normal and Schizophrenic Inner Experience** Russell T. Hurlburt,2012-12-06 What are the basic data of psychology In the early years of experimental psychology they were reports of brighter or heavier or other estimates of the magnitude of differences between the sensory stimuli presented in psychophysical experiments Introspective accounts of the experience of seeing colored lights or shapes were important sources of psychological data in the laboratories of Cornell Harvard Leipzig or Wuerzburg around the turn of the century In 1910 John B Watson called for the objectification of psychological research even parodying the typical subjective introspective reports that emerged from

Edward Bradford Titchener's laboratory For almost fifty years psychologists largely eschewed subjective information and turned their attention to observable behavior Rats running mazes or pigeons pecking away on varied schedules of reinforcement became the scientific prototypes for those psychologists who viewed themselves as doing science Psychoanalysts and clinical psychologists sustained interest in the personal reports of patients or clients as valuable sources of data for research For the psychologists questionnaires and projective tests that allowed for quantitative analysis and psychometrics seemed to circumvent the problem of subjectivity Sigmund Freud's introduction of ongoing free association became the basis for psychoanalysis as a therapy and as a means of learning about human psychology Slips of the tongue thought intrusions fantasies hesitations and sudden emotional expressions became the data employed by psychoanalysts in formulating hypotheses about resistance memory transference and a host of presumed human wishes and conflicts
