Research Circular - Ohio Agricultural Experiment Station Ohio Agricultural Experiment Station, 1958      *Introduction to Plant Science* R. O. Parker, 2004 This revised text provides a comprehensive introduction to the fascinating world of plant science From the basic requirements for plant growth to genetic engineering and biotechnology this easy to understand book is ideal for the high school level agriscience curriculum or college freshman level plant science course Students will learn about the origins of cultivated plants structure and anatomy photosynthesis respiration propagation production of major agronomic crops and more      Team Teaching and Team Learning in the Language Classroom Akira Tajino, Tim

Stewart, David Dalsky, 2015-12-14 This book reignites discussion on the importance of collaboration and innovation in language education The pivotal difference highlighted in this volume is the concept of team learning through collaborative relationships such as team teaching It explores ways in which team learning happens in ELT environments and what emerges from these explorations is a more robust concept of team learning in language education Coupled with this deeper understanding the value of participant research is emphasised by defining the notion of team to include all participants in the educational experience Authors in this volume position practice ahead of theory as they struggle to make sense of the complex phenomena of language teaching and learning The focus of this book is on the nexus between ELT theory and practice as viewed through the lens of collaboration The volume aims to add to the current knowledge base in order to bridge the theory practice gap regarding collaboration for innovation in language classrooms      **Biennial Report of the**
