The rake is shipped in one complete bundle, except for the hitch bundle and telescope drive bundle. They are optional bundles. Cut the bands from around the shipping crate and dismantle the crate. Cut the wires so all parts wired to rake can be removed, and lay them out

in such a manner as they can be easily located when you are ready to attach them. Thoroughly oil all working parts as they are being attached. Follow the instructions carefully, so as to get the machine properly set up and adjusted.

FRAME

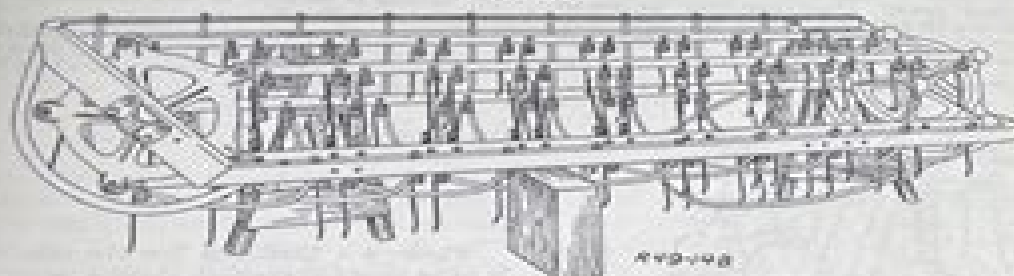

FIG. 1

Figure 1 - After the shipping crate and all wired parts are removed from the frame, set a pair of trestles under the front frame angle and a wooden block or some other suitable support under the rear frame angle as illustrated. One tooth bar is shipped with the teeth in the reverse position

as illustrated on left end of tooth bar. This prevents damage in shipment. Be sure to remove these teeth and bolt into operating position on the correct side of tooth bar as they will be the same as on the rest of the bars. Make sure all bolts are drawn up tight.
