

Dissection of a Yellow Perch

General Notes about Dissections:

- Take extreme care when using dissecting instruments, particularly scalpels. Make cuts away from your body
- Cut lightly so you don't dissect what you want to see
- Keep sharp dissection tools pointing down when held in your hand
- Your fish has been preserved in a chemical solution. Wear plastic gloves and goggles at all times.
- Clean up the work area and wash your hand thoroughly when finished

Respect for living things and the environment is considered essential for meaningful work in science and technology.

Perch Guide For Dissections:

A course in vertebrate zoology; a guide to the dissection and the Henry Sherring Pratt,1938 Laboratory Guide to Vertebrate Dissection for Students of Anatomy Arthur Beeny Appleton,1929 As its title indicates this is a book for use in a practical comparative anatomy course It is intended for a somewhat unusual class of student and consequently its contents outlook and method of treatment are unlike those of the standard texts in this subject As stated in the preface it is assumed that the student has already done a course in elementary zoology including the usual vertebrate types and has also examined in more detail a mammal Unless this mammal were man a number of comparisons in the book would be missed To obtain full benefit from it the student should obviously have taken the preliminary medical studies including a fair amount of human anatomy This is not meant to imply that the student of advanced zoology cannot get many useful hints and fresh points of view from its pages he undoubtedly can The types treated in a series of regional dissections are the lamprey the dogfish *Squalus Necturus* the lizard and the dog As it is intended for assistance in dissection information regarding osteology and the details of the central nervous system have been purposely omitted and conversely the muscles are treated somewhat more fully than is customary **How to Dissect** William Berman,2012-03-27 A beginner's guide to dissecting everything from an earthworm to a frog to a feral pig perfect for a middle school classroom This 214 page manual features over 821 step by step illustrations providing a perfect introduction to the art of dissection Updated and easy to follow these guided projects cover everything from simple earthworms to the complex fetal pig Ages 12 **Exploring Zoology: A Laboratory Guide, Third Edition** David G. physiology which have greatly influenced our understanding of fish function as well as generating questions that have yet to be resolved Fish taxa represent the largest number of vertebrates with over 25 000 extant species However much of our knowledge apart from taxonomy and habitat descriptions has been based on relatively few of them usually those which live in fresh water and or are of commercial interest Unfortunately there has also been a tendency to base our interpretation of fish physiology on that of mammalian systems as well as to rely on a few type species of fish This accessible textbook will redress the balance by using examples of fish from a wide range of species and habitats emphasizing diversity as well as recognizing shared attributes with other vertebrates
