Functional Genomics Stephen P. Hunt, Frederick Livesey, 2000 With the complete genomes of many organisms now available and the first draft of the human genome imminent there is an increasing demand from researchers in a range of disciplines for techniques that will allow them to utilize these resources in their own research This book provides a comprehensive treatment of the range of methods available for gene and protein expression profiling in a variety of systems These include large scale methods such as cDNA microarrays serial analysis of gene expression SAGE and proteomics and also methods suitable for non specialist laboratories such as differential display and suppression subtraction hybridization In all cases the chapters have been written by the developers of these methods or experienced users and include detailed protocols to facilitate the introduction of these methods to the readers laboratories

The Nidoviruses Ehud Lavi, Susan R. Weiss, Susan T. Hingley, 2012-12-06 In 1996 the International Committee for Taxonomy of Viruses ICTV recognized the name Nidovirales as the formal name for Coronaviridae and Arteriviridae In recognition of this change and in response to the

wishes of our colleagues we named this meeting for the first time The International Symposium of Nidoviruses The meeting in the wooded environment of Lake Harmony Pennsylvania provided a stimulating opportunity for assessing the progress made in the field since the last meeting in Segovia Spain in 1997 Over 150 scientists from academia and industry attended the meeting The meeting hosted senior members of the Nidovirus community some of whom have been studying the subject for over 20 years as well as younger scientists the next generation of Nidovirologists The traditional informal format the shared meals the social activities and the relatively inexpensive venue made the meeting a popular adventure In her opening remarks Susan Weiss showed pictures from previous meetings reminding us how young we used to look Neal Nathanson was our keynote speaker at the opening night giving an overview on how viral pathogenesis studies helped in shaping the evolution of viral research and vaccine development The scientific program of the meeting was divided into 9 sessions including 10 keynote presentations The meeting opened with a session on epidemiology evolution and genome structure Sasha Gorbalenya shared with us insights gained from comparative sequence analysis emphasizing the unifying traits among nidoviruses but also pointed out the remaining black holes

CDNA Preparation and Characterization Sherman M. Weissman, 1999-05-17 Knowledge of mRNA structure genomic location and patterns of expression must be converted into information regarding the function of the encoded proteins Each gene can be the subject of years of intensive study Nevertheless a number of methods are being developed that use cDNA to predict properties or permit the selective isolation of cDNAs encoding proteins with certain general properties such as subcellular location The technology in this field is rapidly evolving and these contributions represent a snapshot in time of the number of currently available and useful approaches to the problems referred to above
