

1-1 Functions

Write each set of numbers in set-builder and interval notation, if possible.

1. $x > 50$

SOLUTION:

The set includes all real numbers greater than 50.

In set-builder notation this set can be described as $\{x \mid x > 50, x \in \mathbb{R}\}$. This notation can be read as *x such that x is greater than 50, with x as an element of the real numbers.*

In interval notation it can be described as $(50, \infty)$. This notation can be read as *all values between 50 and infinity*. The parentheses indicate that the 50 is not included.

3. $x \leq -4$

SOLUTION:

The set includes all real numbers less than or equal to -4.

In set-builder notation this set can be described as $\{x \mid x \leq -4, x \in \mathbb{R}\}$. This notation can be read as *x such that x is less than or equal to -4, with x as an element of the real numbers.*

In interval notation it can be described as $(-\infty, -4]$. This notation can be read as *all values between negative infinity and negative 4 inclusive*. The bracket indicates that the -4 is included.

5. $8 < x < 99$

SOLUTION:

The set includes all real numbers greater than 8 and less than 99.

In set-builder notation this set can be described as $\{x \mid 8 < x < 99, x \in \mathbb{R}\}$. This notation can be read as *x such that x is greater than 8 and x is less than 99, with x as an element of the real numbers.*

In interval notation it can be described as $(8, 99)$. This notation can be read as *all values between 8 and 99*. The parentheses indicate that the 8 and 99 are not included.

7. $x < -19$ or $x > 21$

SOLUTION:

The set includes all real numbers less than -19 or greater than 21.

In set-builder notation this set can be described as $\{x \mid x < -19 \text{ or } x > 21, x \in \mathbb{R}\}$. This notation can be read as *x such that x is less than or -19 or x is greater than 21, with x as an element of the real numbers.*

In interval notation it can be described as $(-\infty, -19) \cup (21, \infty)$. This notation can be read as *all values between negative infinity and -19 OR between 21 and infinity*. The parentheses indicate that the -19 and 21 are not included.

9. $\{-0.25, 0, 0.25, 0.50, \dots\}$

SOLUTION:

The set includes multiples of 0.25, starting with 0.25 (-1) or -0.25.

In set-builder notation the set can be described as $\{x \mid 0.25n = x, n \geq -1, n \in \mathbb{Z}\}$. This notation can be read as *x such that x is 0.25 times n for all n greater than or equal to -1, with n as an element of the integers.*

The set cannot be described using one or more inequalities, and therefore cannot be written in interval notation.
