Redeeming Laura English Edition:

Warrior's Redemption Aaron Hodges, The Magisterium doesn't win when they kill us. They win when our young men and women speak like you when despair is so engrained in our people that we no longer fight back. Kaila's magic is breaking and with it the last hope of a dying race. For months she has battled alongside the Elysian, waging a secret war against the Magisterium. Anything to forget what she's lost, what was taken from her. But some pain cannot be buried. And now the very Gift that marks her as cursed is beginning to unravel. As the Magisterium tightens its grip and the rebellion falters, Kaila must finally face the truth about her past. Because if she can't, her magic could do more than just break. Last time she lost control, men died in agony. Next time it could be someone she loves. Can Kaila master her unravelling magic in time to save the Elysian, or will it be the end of them all?

User-Centered Design Stories Carol Righi, Janice James, 2010-07-27 User Centered Design Stories is the first user centered design casebook with cases covering the key tasks and issues facing UCD practitioners today. Intended for both students and practitioners, this book follows the Harvard Case study method where the reader is placed in the role of the decision maker in a real life professional situation. In this book the reader is asked to analyze dozens of UCD work situations and propose solutions for the problem set. The problems posed in the cases cover a wide variety of key tasks and issues faced by practitioners including those related to organizational managerial topics, UCD methods and processes and technical project issues. The benefit of the casebook and its organization is that it offers new practitioners as well as experienced practitioners working in new settings valuable practice in decision making that cannot be obtained by simply reading a book or attending a seminar. The first User Centered Design Casebook with cases covering the key tasks and issues facing UCD practitioners today. Each chapter based on real world cases with complex problems giving readers as close to a real world experience as possible. Offers the things you don't learn in school such as innovative and hybrid solutions that were actually used on the problems discussed.
