

F. Referencing

You can use either footnotes or in-text citations. In either case, the citation should include the author and year, e.g., (Smith 2023). When quoting some text or referring to a specific passage or argument, you should also include the page number, e.g. (Smith 2023, p. 66).

Full details should appear in the bibliography at the end of your essay (e.g., Smith, J. 2023. *My Brilliant Book About Human Nature*. Canterbury: Canterbury University Press).

Feel free to use any standard referencing system (e.g., APA, Chicago, MLA etc.). If in doubt, copy the system used in any academic book or article in the course reading list.

Essays on Reference, Language, and Mind Keith Donnellan, 2012-06-13 Keith Donnellan is one of the major figures in 20th century philosophy of language and mind a key member of the highly influential group that altered the course of philosophy of language and mind around 1970 An innovative philosopher Donnellan's primary contributions were published in article form rather than books This volume presents a highly focused collection of articles by Donnellan beginning with his 1966 groundbreaking Reference and Definite Descriptions historically the first move in the direct reference direction In the late sixties and early 1970s the philosophy of language and mind went through a paradigm shift with the then dominant Fregean theory being questioned by what has come to be known as the direct reference turn Donnellan played a key role in this shift focusing on the relation of reference a touchstone in the philosophy of language and the relation of thinking about a key idea in the philosophy of mind The debates about the metaphysical and epistemological foundations of direct reference ended up forming the agendas of the philosophies of language and mind Donnellan's ideas are the heart of such ongoing debates This volume which collects his key contributions dating from the late 1960s through the early 1980s alongside an introduction by one of the editors Joseph Almog disseminates the work to a new audience and for posterity This collection will be of interest to philosophers of language and mind and of contemporary metaphysics and epistemology as well as of linguistics and cognitive psychology

Reference, Truth and Conceptual

Schemes G. Forrai, 2013-03-14 1 **HISTORICAL BACKGROUND** The purpose of the book is to develop internal realism the metaphysical epistemological doctrine initiated by Hilary Putnam Reason Truth and History Introduction Many Faces In doing so I shall rely sometimes quite heavily on the notion of conceptual scheme I shall use the notion in a somewhat idiosyncratic way which however has some affinities with the ways the notion has been used during its history So I shall start by sketching the history of the notion This will provide some background and it will also give opportunity to raise some of the most important problems I will have to solve in the later chapters The story starts with Kant Kant thought that the world as we know it the world of tables chairs and hippopotami is constituted in part by the human mind His central argument relied on an analysis of space and time and presupposed his famous doctrine that knowledge cannot extend beyond all possible experience It is a central property of experience he claimed that it is structured spatially and temporally However for various reasons space and time cannot be features of the world as it is independently of our experience So he concluded that they must be the forms of human sensibility i e necessary ingredients of the way things appear to our senses **Perception, Realism, and the Problem of Reference** Athanassios Raftopoulos, Peter Machamer, 2012-04-12 The chapters in the book address the problem of reference as it relates to perception and to debates about realism *On Reference* Andrea Bianchi, 2015-03-05 Most of the times we open our mouth to communicate we talk about things This can happen because some of the linguistic expressions we use have semantic properties that connect them to extra linguistic entities Thanks to these properties they may be used by us to refer to things Or as we may also say they themselves refer to things though in certain cases they do so only relative to a context of use But how can we characterize the semantic properties in question What exactly is reference Philosophers have been trying to answer these questions at least since Plato's Cratylus but not until the last century when language occupied center stage in philosophy did the problem come to be felt as really pressing In the last decade of the nineteenth century Gottlob Frege produced an account of reference that set the stage for the contemporary discussion Nevertheless around 1970 a number of powerful arguments against it were produced by Saul Kripke and others As a result many philosophers began to look at reference from a new perspective which highlighted the crucial role played by worldly historical facts that may be unknown to the speakers This semantic revolution however left us with a number of open problems The eighteen original essays collected in this volume deal with many of these problems thus contributing to our understanding of the nature of reference its role in cognition and the place it should be given in semantic theory *The American Bookseller's Complete Reference Trade List, and Alphabetical Catalogue of Books in this Country* Alexander Vietts Blake, 1847 **The Structure of Philosophical Discourse** Kyle Lucas, Sarah Lucas, 2024-03-29 This book builds on existing work in genre analysis and move analysis in English for Specific Purposes ESP and applies this new framework to academic philosophical discourse offering new insights into how ESP traditions can elucidate shifts in language conventions across disciplinary contexts The volume begins by surveying the state of the art in English for Specific Purposes

and genre theory as well as other genre theory paradigms before turning the focus on move analysis Lucas and Lucas seek to maximize the potential of move analysis to precisely operationalize functional units of discourse by implementing a cognitive theory of genre grounded in frame semantics Using the case of academic research articles in philosophy the authors demonstrate how this framework can reveal distinctive dimensions unique to philosophical discourse and in turn how such an approach might be applied more broadly to examine nuances in language across disciplines and inform ESP research in the future This book will appeal to students and researchers in English for Specific Purposes discourse analysis academic writing applied linguistics and rhetoric and composition **Catalogue of the Reference Department** ,1896 **Reference**

Catalogue of Current Literature ,1924 **Reference and Referring** William P. Kabasenche,Michael O'Rourke,Matthew H. Slater,2012-12-21 Original essays on reference and referring by leading scholars that combine breadth of coverage with thematic unity These fifteen original essays address the core semantic concepts of reference and referring from both philosophical and linguistic perspectives After an introductory essay that casts current trends in reference and referring in terms of an ongoing dialogue between Fregean and Russellian approaches the book addresses specific topics balancing breadth of coverage with thematic unity The contributors all leading or emerging scholars address trenchant neo Fregean challenges to the direct reference position consider what positive claims can be made about the mechanism of reference address the role of a theory of reference within broader theoretical context and investigate other kinds of linguistic expressions used in referring activities that may themselves be referring expressions The topical unity and accessibility of the essays the stage setting introductory essay and the comprehensive index combine to make Reference and Referring along with the other books in the Topics in Contemporary Philosophy series appropriate for use in advanced undergraduate and graduate courses
